Met Office, Hadley centre

## **On the ACRE initiative**

The international Atmospheric Circulation Reconstructions over the Earth (ACRE) initiative both undertakes and facilitates the recovery of historical instrumental surface terrestrial and marine global weather observations to underpin 3D weather reconstructions (reanalyses) spanning the last 200-250 years for climate applications and impacts needs worldwide. All of the historical surface weather data and the reanalyses are freely available.

14 March 2012, 2-4 p.m.
