

Celebrating 100 years of the Medical Research Council

GENOME DAMAGE and STABILITY CENTRE

OPEN DAY - FRI 21 JUNE 2013

The Centenary Open Day will combine talks, discussions and hand-on experiments with an exhibition of scientific images and art installations to explore ...

REPAIR OF DNA DAMAGE

'What we know & how we know it'

Talks and Discussion:

led by internationally-renowned experts

Rare genetic diseases:

what can they tell us?

Scientific discoveries:

how do they drive new therapies and patient care?

Cell growth and division:

what happens when this goes wrong?

Damaged DNA:

how is it repaired? how can it lead to cancer?

XP: a genetic DNA repair disorder with extreme sensitivity to sunlight
