IT at Sussex is evolving rapidly as technologies and requirements develop and these graphics show some of the dramatic changes of the last few years.

### Internet speed

In 2014, new connections to the internet boosted the University’s total bandwidth, laying the foundation for further improvements in internet speed for staff and students.

- **3 Gigabits/s** 2013
- **20 Gigabits/s** 2015

### Student computers

The number of computers available for all students has doubled since 2011.

- **460** 2011
- **900** 2015

### Wi-fi access

There’s been a huge increase in the number of wi-fi access points, both in residences and the main campus buildings.

- **360** 2011
- **1,150** 2015

### New services

- New cameras, laptops & camcorders to borrow
- Office 2013 on student PCs
- Chromebooks for loan
- New services in Sussex Mobile
- Easier wi-fi setup
- Printing from laptops
- High spec PCs in Richmond
- Printing from laptops
We spend so much of our time trying to improve services for the future, it’s easy to forget how much has already changed. The front page gives an idea of the dramatic developments in the last few years but there’s a lot more to come.

It was great to see so many first years taking part in our survey last term. You gave us a clear sense of the things that are working well and the areas that need more attention and we’re already working hard on the next steps.

Paul Davies
Director of IT Services

How satisfied are you with...?

Last term we asked all first years to give their first impressions of IT at Sussex and more than 500 of you responded. These charts show how many are satisfied or very satisfied with some key services but see our website for more details including the actions we’re taking in response. sussex.ac.uk/its/survey

The University has made considerable investments in the wi-fi network in the last few years but we’re always looking at areas that need improvement as demand grows. The next steps we’re taking are to enhance the wi-fi in Northfield and the Library.

Work has already started to increase the number of wi-fi access points in Northfield. We’re adding over 150 new hotspots so residents will be able to use wi-fi in far more places.

Some of the network infrastructure in the Library is reaching the end of its operational life and is acting as a wi-fi bottleneck at busy times. Replacing it is a complex job but we’re making preparations to upgrade it as soon as we can.
