

Feedback and Marks for Climate Change Essay

This essay contains many examples of a good understanding of the causes of climate change and the challenges developed and developing world nations face in mitigating and adapting to them. You have read widely around this area and, at times have supported your arguments with relevant examples and evidence (APPLICATION + KNOWLEDGE). Typical examples can be found in the sections of the essay that discuss mitigation and adaptation.

You were able to express your ideas clearly most of the time, but there were moments of 'inconsistency' in the flow and coherence of your arguments. The last paragraph on page 1 and the second paragraph on page 2 demonstrate this, but perhaps this digression or inconsistency is more connected with effective paragraph formation. (APPLICATION + CLARITY)

You write using a suitable register, often using technical language and terminology specific to this discipline. However, there were a significant number a minor composition errors i.e. spelling, grammatical. Please proof-read your essays thoroughly before final submissions. (CLARITY)

Concentrate on writing more concise paragraphs with clear topic sentences and relevant supporting sentences. Make sure that your supporting details/references/examples directly connect to the main theme/idea presented in the topic sentence of a paragraph.
