

# **The Birmingham eMind Conference:**

## **Is technology rewiring young minds?**

***Muirhead Tower, University of Birmingham, B15 2TT***

***6<sup>th</sup> June 2014, 9.30am – 6pm.***

**Is the digital revolution turning kids into screen addicts?**

**Do social networking sites encourage eating disorders?**

**Can technology help kids with autism communicate?**

### **Speakers include:**

**Professor Peter Smith** from Goldsmiths University will talk about social development and cyber-bullying.

**Professor David Daley** from University of Nottingham will talk about how technology can improve life for families of children with neurodevelopmental disorders.

**Dr Nicola Yuill** from Sussex University will speak about how technology can support collaborative work and play in children with Autism Spectrum Disorder.

**Dr Sarah Williams** from Bournemouth University will focus on digital technologies (websites, mobile apps and social media) for eating disorders.

**Dr Karen Guldborg**, from University of Birmingham will speak about Technology Enhanced Learning for children with autism; the training needs of practitioners in the field of autism and on notions of 'good autism practice'.

Poster and speaker abstracts accepted from new and established researchers. This is a chance to showcase your research/research proposals in a small and welcoming environment. Lunch is provided.

## **Deadline for registration and abstracts is 2<sup>th</sup> May.**
