

“Better Evidence & better Outcomes?”

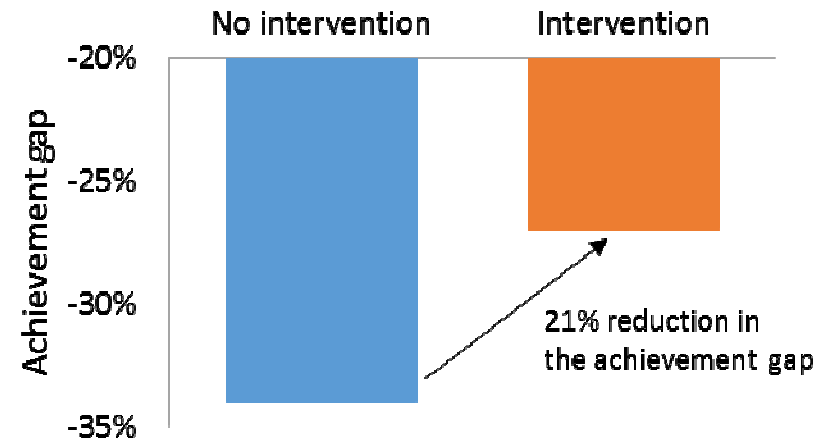

Writing about values Project

using short in-class writing exercises about values to increase pupils' attainment

The project

- High impact – become part of a national trial that has the potential to increase attainment of Y10 + Y11 pupils
- Low demand – 3 short in-class writing exercises (20 min each) + baseline and follow-up survey (15 min each)
- Full support – teacher briefing to support delivery of exercises + dedicated contact person who delivers and collects all materials
- Engaging exercises – the exercises give pupils an opportunity to write reflectively about topics that are not directly linked to their GCSE syllabus
- £1000 honorarium – for schools that complete the whole trial

In North America, the intervention reduced the achievement gap between high- and low-achieving groups
