Solar module prices to fall another 20% in 2017

March 7 (Renewables Now) - Solar module prices will keep falling in 2017 amid a continued global oversupply, according to Bridge of India, which expects prices to end this year 20% below end-2016 levels.

Prices have already dropped by 26% in 2016.

The consultancy says that global demand will be almost stagnant in 2017 at about 75 GW, while
