Challenge

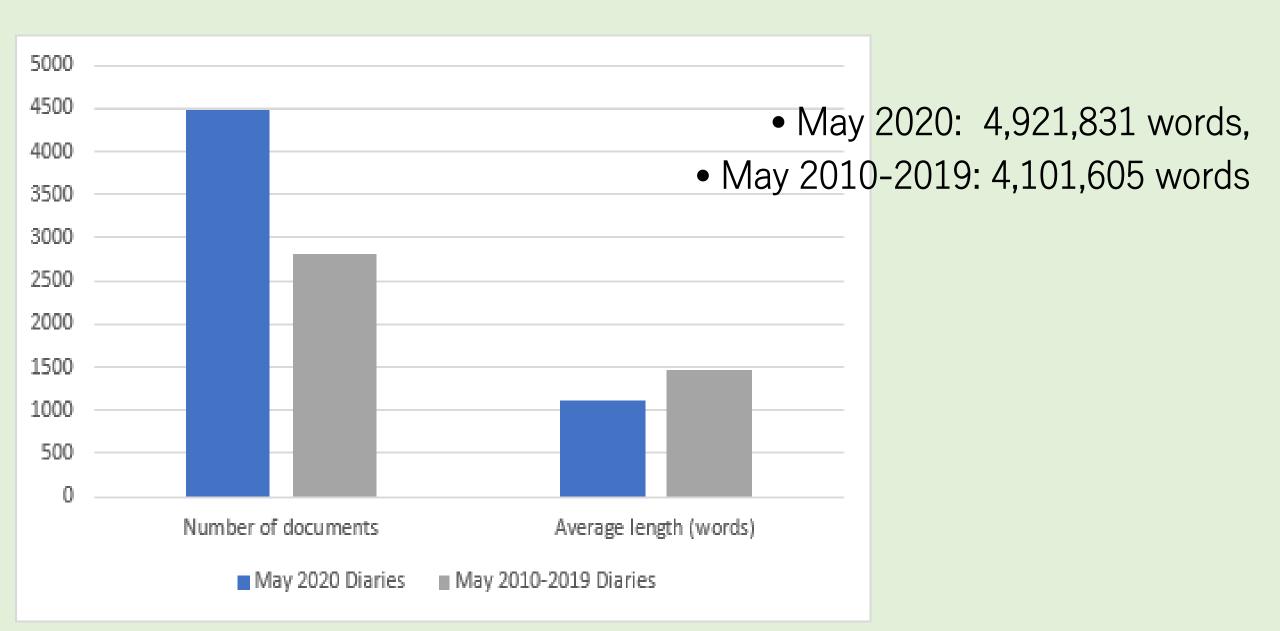

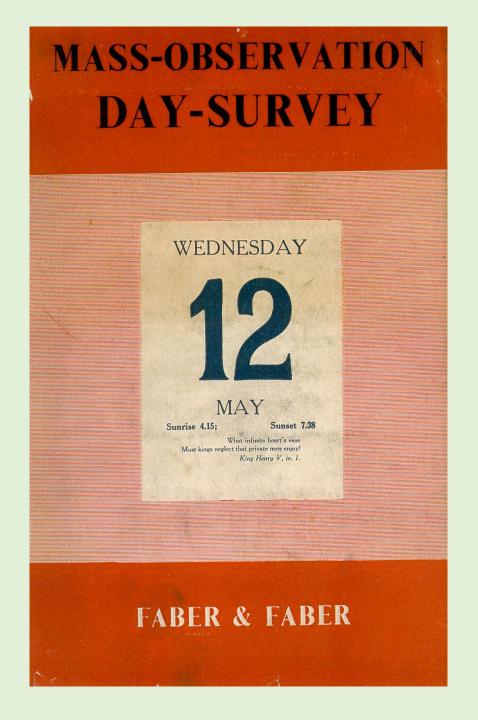

- HEIF funding to support work with non-academic partners to address their challenges and opportunities presented by the Covid-19 pandemic
- How to support <u>society's recovery</u> from the Covid-19 pandemic?

Aims

- What are the patterns of thinking in 2020 as compared to the previous decade?
 - Unintuitive
- How these patterns of thinking are distributed in space?

About the data

May 12th case study

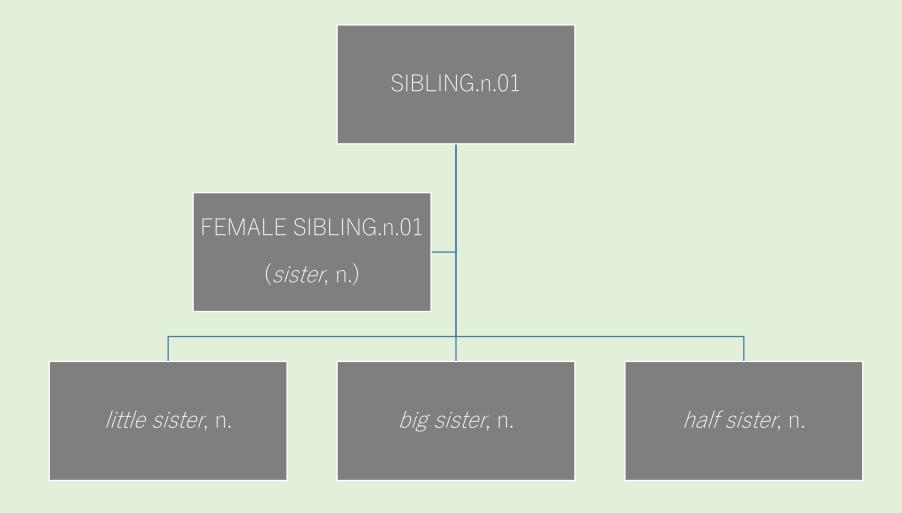

In 1937 Mass Observation called for people from all parts of the UK to record everything they did from when they woke up in the morning to when they went to sleep at night on 12th May. The resulting diaries provide a wonderful glimpse into the everyday lives of people across Britain and have become an invaluable resource for those researching countless aspects of the era.

 Dear diary Today at 8:21 I woke up and the sun was shining but still I couldn't meet my friends.i went down stairs as i ate my breakfast i looked out the window but the sun wasn't shining it was just like every other day it was dark and lonely nothing alive came past it was just the wind blowing and some bugs flying. 9:00 I started distance learning. 11:30 I went to my back garden and played around with a ball until I got bored and went back inside. 11:50 I opened the computer and continued learning. 2:00 I finished all the work yay!. I went out for a jog around the park. It's around 4mins if you run but around 14mins if you walk to the park it's really I go for a jog every day but it's never the same as running around with your friends playing a game of tug or something. 3:00 I was back. I was hungry and me and my family sat and ate lunch. 3:30 I played fun online games with my friends. We also talked on skype for a while but it wasn't the same. 4:30 l played board games with my family and we also played with a ball. 6:00 my dad, my mum, my sister and I went to watch Star wars. My little sister was too young so she went to watch a movie on the computer. 8:12 we had a quick dinner. 8:30 I went for a bath, got dressed, brushed my teeth and went to bed but the only thing I could think of is will I ever be able to see my friends and family again.

CRIME in 2020: A new conceptual bundle

vandalize, plunder, robber, heist, thief, moll 'criminal', forfeit criminally

criminal n./adj.

2010-2019

• record, changes, act, damage, past, police, past

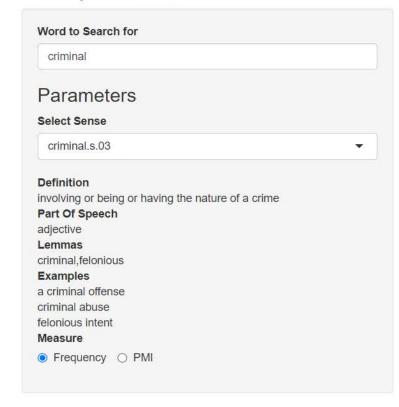

2020

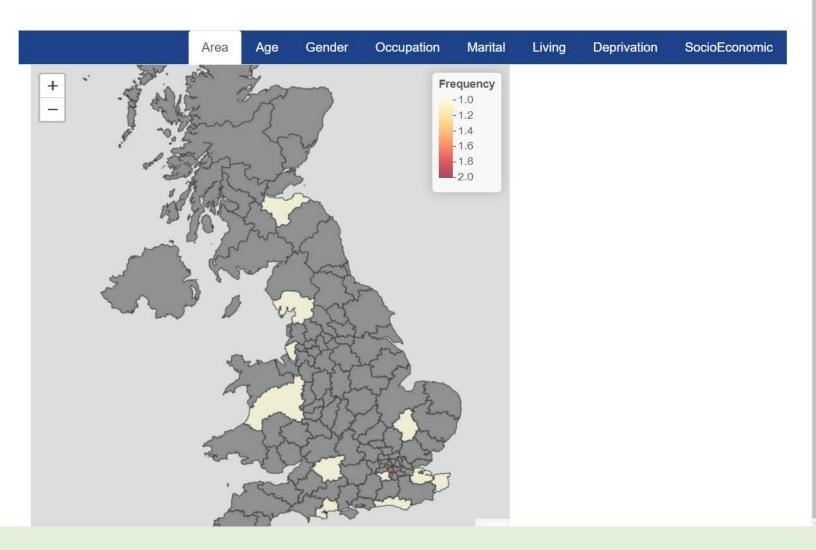

• negligence, neglect, government policies

ego+ criminal

- every Saturday morning I go to the mini-Tesco to buy the Guardian and top up the basics like milk and bread. I feel like a criminal every time I go out. I've occasionally had to queue outside shops, but not for long. I've discovered that if I can get
- keep my face turned away. Some people don't bother. Last Tuesday, for the first time, I wore a face mask, and felt less of a criminal - doing my bit to stop my nasty droplets spreading. One challenge has been the lack of Quorn pieces for our vegetarian
- or find alternatives. The bigger supermarket is a weird experience. I haven't enjoyed it much. One feels almost criminal. I have glanced at online shopping, but there are no slots. During the week we top up our shopping milk, fresh fruit & veg
