
Table of EU requirements

Graduates from universities in other EU countries can be considered for the Chancellor's Masters Scholarship. The table below provides guidance about the minimum undergraduate / bachelors requirement for consideration for the scholarship. Only graduates with excellent results, achieving approximately the top 10-15% of grades in their undergraduate degrees, will be considered. Achieving these grades does not guarantee a scholarship, as there are a limited number of awards and the application process is competitive, however this table provides guidance for a number of EU countries. If your country is not listed please email cmscholarship@sussex.ac.uk for guidance.
