The Technology Enhanced Learning (TEL) team, based in Essex House, was launched in January 2014 to provide proactive guidance, training and support to staff on the effective use of technology to enhance teaching, learning and the quality of the student learning experience.

You can contact your Learning Technologist for one-to-one support, guidance and training on any of the technologies available at Sussex, or any other technology that you feel may enhance your teaching practice or your students' learning. Turn over to find the Learning Technologist responsible for your school.

Poll Everywhere

Do you have large lecture groups? Would you like to find a way to make your lectures more interactive and engaging?

You need look no further than Poll Everywhere; a system which allows students to respond to a question by text, Twitter, or web browser using their own mobile device. In large lectures, seminar classes or workshop groups, this method can prove to be a useful and fun option.

If you would like to try Poll Everywhere contact the TEL team (tel@sussex.ac.uk) to discuss options.

e-Submission and e-Feedback

Staff training for e-submission and e-feedback (ESEF) is now well underway and the TEL team have been busy over the summer creating online resources to assist all staff and students.

Sign up for training via Sussex Direct and look at materials and resources at: www.sussex.ac.uk/tel/esef

MELSIG is coming to Sussex!

Digital Media Interaction and Inclusivity
University of Sussex
9 September 2014

The Technology Enhanced Learning team are very excited to announce that the Media Enhanced Learning Special Interest Group (MELSIG) will be hosting their next event at the University of Sussex on 9 September 2014.

Usually hosted on the northern side of the Watford Gap, MELSIG has been running since 2008 and has hosted over 20 events. The TEL team feel this is a great opportunity to demonstrate the work that is happening in this area.

The forthcoming event asks us to consider how digital media can be used positively to address disadvantage in

teaching and learning, and in disciplinary practice. It will also explore the challenges and opportunities facing individuals operating in professional contexts.

Attendance is **free** and you can sign up for the event using the QR code opposite or by registering at
