Expected Interview date: TBC
Expected start date: ASAP

This is a fantastic opportunity for a highly motivated, experienced, hard-working individual to advance their career in technical management, especially within the medical research field.

The Senior Technical Manager will provide leadership and professional operational management of core technical service in the Brighton and Sussex Medical School (BSMS) to ensure the delivery of high quality, effective, flexible support to students and academics. Working to ensure that technical operations in BSMS run smoothly on a day-to-day basis. This post will be part of a wider University wide Technical Management group and provide line management of Psychology technicians to ensure consistency in good practice.

The role will call for change and project management experience, excellent interpersonal skills, and a dedication to providing excellent customer service, compliance and health & safety support.

Please contact Robert Fowler R.E.Fowler@Sussex.ac.uk for informal enquiries.

The University is committed to equality and valuing diversity, and applications are particularly welcomed from women and black and minority ethnic candidates, who are under-represented in academic posts in Science, Technology, Engineering, Medicine and Mathematics (STEMM) at Sussex.

Department: Technical Services

Section/Unit/School: Brighton and Sussex Medical School

Location: Medical Research Building, Falmer Campus

Grade: 8

Responsible to: Head of Technical Services

Responsible for: Technical Supervisor x 3, Technical Specialist x 2

PRINCIPAL ACCOUNTABILITIES

1. Lead, manage, promote and maintain a high-quality Technical Services department, engendering a culture of continuous improvement.

2. Ensure the delivery of services of the department.

3. Ensure compliance with all relevant legislation and University policies, interpreting the same and advising on their practical application.

4. Work in partnership with other key stakeholders (staff, students, visitors and contractors) to ensure seamless service.

5. To work with Heads of Schools and Academic/Professional Service leads within BSMS to ensure that core Technical staff are efficiently, effectively and equitably deployed enabling the local Teaching and Research objectives to be achieved.

KEY RESPONSIBILITIES

1. Departmental Management and Leadership
1.1 Provide management and leadership to motivate the department to achieve targets and objectives.

1.2   Ensure the availability of resources to achieve targets and objectives including the selection, induction, performance management and development of all members of the department.

1.3   Ensure departmental understanding and application of operational standards are embedded in the departmental culture and methods of working.

1.4   Support the development of others, providing training and coaching in area of expertise

1.5   Foster an ethos of continuous improvement.

1.6   Carry out budgeting exercises and implement cost control measures, within area of responsibility, within policies laid down. Provide budgetary advice to management to support decision making.

2.   Service Delivery

2.1   Working within overall university policy and procedure, ensure the effective management of responsibilities in the area of expertise. Plan and allocate resources to support the achievement of departmental targets and objectives.

2.2   Ensure effective systems and procedures are in place to support the achievement of key performance targets in area of responsibility.

2.3   Contribute to the development of departmental/functional strategic planning process.

2.4   Ensure the delivery of improvements to systems and procedures to maintain effective service delivery within area of responsibility.

2.5   Ensure appropriate records and documentation are maintained commensurate with policy and procedure.

2.6   Provide reports and other communication media internally and externally as appropriate. To undertake analysis, interpretation, and presentation of complex information to inform decisions related to subject area.

2.7   Identify critical issues when resolving problems particularly where there is complex or competing information and use university policy and objectives to make decisions.

3.   Policy and Procedure

3.1   Based on a broad and deep set of knowledge and experience, interpret policy and procedure, providing advice on the application of policy as required.

3.2   Contribute to the shaping of policy decisions and improvement in area of expertise.

3.3   Ensure appropriate governance is in place for area of expertise.

4.   Customers and Stakeholders

4.1   Proactively work with internal and external stakeholders to ensure the effective service delivery, initiate and develop relationships, providing data and information to inform decisions as necessary, showing appropriate sensitivity when needed.

4.2   Persuade, influence and negotiate as appropriate to further the objectives of the University

5.   Role Specific Key Responsibilities

5.1   To develop, agree and monitor Service Level Agreements, KPIs and Service Catalogues with the Head of Technical Services and Associate Director of Technical Operations to reflect the core research support requirements of the School of Life Sciences, and to assess and respond to customer feedback to ensure continuous improvement.

5.2 To monitor and analyse performance against the Technical Services KPIs, highlight deviations and subsequently carry out root cause analysis and implement corrective actions as necessary.

5.3 To ensure University Health and Safety and any other relevant legislative guidelines are disseminated and implemented by all technicians within a defined area.

5.4 Responsibility for ensuring that all Risk assessments and Standard Operating Procedures for technical services staff in immediate team are completed, where applicable.

5.5 Oversight and overarching view of daily resource allocation of technical support across BSMS, working closely with Technical Supervisors.

5.6 Overarching management of equipment inventory, service/maintenance contracts and testing (including non-ducted LEVs) for BSMS, day-to-day supervision delegated to relevant Technical Supervisors. Ensure accurate equipment inventory is maintained and that all required subscriptions/licenses are in place and remain up to date.

5.7 Oversight of managing access to the specialist areas for internal and external stakeholders in BSMS, day-to-day supervision delegated to relevant Technical Supervisors.

5.8 Ensuring that chemical inventories are maintained for technical area

5.9 Engage with and enact upon space management decisions across the school.

5.10 Oversight of internal (Estates/IT) and external contractors, day-to-day supervision delegated to relevant Technical Supervisors

5.11 Liaise with Estates/IT and end users to ensure the delivery of minor building projects in their designated area, using specialist knowledge to ensure compliance, H&S and business requirements are met.

5.12 PCARD Holder for school to cover Technical Supervisors when unable to provide PCARD support in their areas.

5.13 Oversight of the disposal of specialist laboratory waste, including clinical, offensive and chemical waste in defined area. Day-to-day management delegated to relevant Technical Supervisors.

5.14 Be able to attend site in the case of an emergency/equipment breakdown in non-normal working hours and holidays.

5.15 Oversight of Human Tissue sample management for the BSMS

To carry out any other duties that are within the employee's skills and abilities whenever reasonably instructed.

This Job Description sets out current duties of the post that may vary from time to time without changing the general character of the post or level of responsibility entailed.

INDICATIVE PERFORMANCE CRITERIA

- Leading a team of 5 direct reports. Ability to delegate certain authority/tasks to direct reports, where suitable.

- Manage a budget of ~£100k

- Responsible for core technical areas in BSMS, especially equipment and premises in wash up and prep-room areas.

- Responsible for the achievement for the target of providing an effective and efficient technical service in core support for Life Sciences
