

A-Z marks conversion scales for study abroad undertaken in 2022/23 onwards

Marks have been converted using a 5 or 12 point conversion scale wherever possible and have been bench marked against other comparable institutions. Where a scale comprises of 5 or 12 points, the scale has been mapped in a linear manner, where possible. Marks will be converted in accordance with the published conversion scales, which may result in a mark being converted at a lower conversion point if the higher published conversion point has not been achieved.

For some short numeric scales with a lower number of conversion points, a mid-point will be used to convert a mark which is half way between two conversion points, where this would not result in the rounding of marks. Mid-points have been included on scales for Australia (Queensland), Croatia, Denmark, Estonia, Finland, Greece, Hungary, Malta, Mexico and Uruguay, in case the institution provides a grade that is not listed on the published scale

Where a continuous non-categorical 0-100 scale is used that is well aligned to the UK HE sector, the mark is directly imported.

Only the categorical grade is used for some host institutions which provide a numeric and other categorical grade (for example an alpha grade) on the transcript. This is because the numerical scale is not recognised by the University.

A single scale has been approved for each partner country/institution, regardless of discipline. Conversion scales will be reviewed every three years.

Australia

[University of Adelaide](#)

[Monash University](#)

[Monash University, Malaysia campus](#)

[University of Tasmania](#)

[University of New South Wales](#)

[University of Western Australia](#)

[Australian National University](#)

[Curtin University](#)

Adelaide, Monash (including all Monash campuses), Sydney, New South Wales, Tasmania and University of Western Australia: A continuous 0-100 scale is used, aligned with the UK HE sector. Therefore the mark is directly imported.
