~What is Biodiversity and what are the ~~thents~~ thenats for it?

Bio-diversity is the "Biological diversity" which includs ~~Voriou~~ the varity of the whole ~~species~~ speices present on earth, & It includs different animals, plants, micro-organisms and their geneis, water-ecosystems, terrestril, and mairine eco-systems in which they are present.

Bio-diversity is necessary to our exitence and ~~a So much in its valuable in own right.~~ so well so valuable in own right Biodiversity includes fundamental things to our health like fresh ~~air~~ water, clean air and ~~ma~~ food products ~~so well us well us the so well so~~ as well as the many other products such as timber and fiber.

Biodiversity includs other important things and serices us so cultural, recreational and speritual, nourshment ~~they th~~ play an improtan role in maintaing in our personal life as well as social life.

So, it is important task ~~atto~~ to all of us take care of our 'Bio-diversity' and we should maintaine it. Over ~~the~~ the last 200 years Australia has suffeard the laregst occumaintained decline in ~~Bio-diversity~~ our 'Bio-diversity' of any contenen Despite efforts to manage thearts and pressures biodiversity in Australia, ~~in~~ it is still in declean

Main thearts in our Biodiversity are given below:

1) Degradation, Frogmentation and loss of habite
2) Spreding of invassive speices
3) Changes of Climate
4) Unsastanabile use of natural ~~ress~~ recessource.
5) Inapporopite fire reginess
6) Changes wittin aquatic enviroment and water blows.

<u>'When ~~we~~ ^{we} should conserve 'Bio-diversity'.</u>

Human should conserve 'Bio-diversity' because
if its own benifits for example services and ~~P. biolo~~
biological ~~services~~ necessource to essential ~~for we live~~
our life ~~is~~ on earth. ~~Its includs our personal life~~
~~benifits and social benifits.~~ pronices speritual benifit
~~for we live our life on earth. Its includs our personal~~
~~life benifite and social benifits.~~
