

GII Survey Report

Selection: Lithuania.

1) Lithuania, 1936 - 1937 (Centralinis Statistikos Biuras)

Survey ID: 624

297 households

Sample Duration: 1 Year(s)

Notes: This survey was the first undertaken in Lithuania, and was carried out according to the methods agreed by the third conference of international labour statisticians in 1926. Methods were additionally agreed with Latvia and Estonia in a conference in 1934. The aim was to measure standard and cost of living for international comparison. As such, some representativeness was attempted.

The data is presented in individual format per household, showing the income and expenditure on all items of household goods. A separate table shows food quantities consumed per household. Summary grouped data is also presented earlier in the main text of the survey.

Ref ID: 613

Centralinis Statistikos Biuras, 297-niu darbininku, tarnautoju ir valdininku šeimų biudžetų tyrinėjimo Lietuvoje 1936-1937 m. rezultatai (Kaunas, 1939)
