Post Title: Research Fellow in Mathematics
School/department: MPS/Mathematics
Hours: Full time. Requests for flexible working options will be considered (subject to business need).
Location: Brighton, United Kingdom
Contract: 24 months fixed term until 31 October 2025
Reference: 21736
Salary: starting at £37,099 to £44,263 per annum, pro rata if part time.
Placed on: 29 September 2023
Closing date: 20 October 2023. Applications must be received by midnight of the closing date.
Expected Interview date: To be confirmed
Expected start date: November 2023 or soon thereafter

The Department of Mathematics at the University of Sussex is inviting applications for a fixed term postdoctoral position in the Analysis of Partial Differential Equations (PDEs).

We welcome candidates from this area broadly, but candidates with an interest in the analysis or numerical analysis of problems in the calculus of variations, elliptic or hyperbolic PDEs are particularly encouraged to apply.

The post is part of a larger project funded by an ESPRC New Investigator Award, aiming to better understand static and dynamic theories in nonlinear elasticity.

The post-holder will work closely with the principal investigator Dr. Konstantinos Koumatos and join the Analysis and Partial Differential Equations research group at Sussex, a vibrant group currently consisting of 7 permanent members and several early career researchers.

Prospective candidates should hold a PhD in Mathematics or be in the final stages of writing up their PhD thesis and have submitted by the start date of the position.

Examples of topics that are pertinent to this job include:

- Generalised convexity and monotonicity conditions, e.g. quasiconvexity and quasimonotonicity
- Viscosity and thermal effects in elastodynamics
- Finite element methods for static and dynamic problems in elasticity
Candidates should include in their application the following:

- Academic CV
- A personal statement outlining their research interests and their research experience to date
- Contact details for two suitable referees
- Application form

Please contact Dr Konstantinos Koumatos (k.koumatos@sussex.ac.uk) for informal enquiries.

The University is committed to equality and valuing diversity, and applications are particularly welcomed from women and black and minority ethnic candidates, who are under-represented in academic posts in Science, Technology, Engineering, Medicine and Mathematics (STEMM) at Sussex.

"Please note that this position may be subject to ATAS clearance if you require visa sponsorship."

For full details and how to apply see our vacancies page

The University of Sussex values the diversity of its staff and students and we welcome applicants from all backgrounds.

Please note: The University requires that work undertaken for the University is performed from the UK.

2. The School / Division

Please find further information regarding the school/division at http://www.sussex.ac.uk/maths/

3. Job Description

Job Description for the post of: Research Fellow in Mathematics

Department: Mathematics

Section/Unit/School: Mathematical and Physical Sciences

Location: Pevensey III, University of Sussex, Brighton, UK

Grade: 7

Responsible to: Principal Investigator through to Head of School

Responsible for: Research Fellow I is an early career-grade research position. Post-holders will be expected to contribute to the work of the research team, and also to develop their research skills with support from more experienced members of staff.

PRINCIPAL ACCOUNTABILITIES
1. To engage in individual and/or collaborative research activity resulting in high-quality publications; and to develop research funding and knowledge exchange income individually or in collaboration with others, as appropriate, depending on the size and scope of the bid.

2. To contribute to School teaching activities.

KEY RESPONSIBILITIES

Research, Scholarship & Enterprise

1. Develop research objectives and proposals for own or joint research, at acceptable levels, with assistance if required.

2. Conduct research projects individually and in collaboration with others.

3. Analyse and interpret research findings and draw conclusions on the outcomes.

4. Produce high-quality research outputs for publication in monographs or recognised high-quality journals, or performance/exhibition, as appropriate, and contribute to the School’s REF submission at acceptable levels of volume and academic excellence.

5. Contribute to the preparation of proposals and applications to external bodies, for example for funding purposes.

6. Individually or with colleagues, explore opportunities for enterprise activity, knowledge exchange income and/or consultancy, where permissible.

7. Build internal contacts and participate in internal networks and relevant external networks in order to form relationships and collaborations.

8. Continually update knowledge and understanding in field or specialism and engage in continuous professional development.

Teaching & Student Support

1. Undertake teaching duties, if required.

2. Assist in the assessment of student knowledge and supervision of student projects if required.

3. Assist in the development of student research skills, for example as part of a postgraduate supervision team.

Contribution to School & University

1. Attend and contribute to relevant School and project meetings.

2. Undertake additional duties, as required by the Principal Investigator and/or Head of School.

Role-specific duties
The post holder will be expected to carry out research in the general area of Partial Differential Equations.

This Job Description sets out current duties of the post that may vary from time to time without changing the general character of the post or level of responsibility entailed.

**INDICATIVE PERFORMANCE CRITERIA**

- A PhD or equivalent scholarly or relevant professional activity
- Pursuing a line of independent research within a research group.
- Publishing research (either from a recently completed PhD or new original research).
- Other forms of externally recognised professional practice of creative output of a standing equivalent to regular publication of original research.
- Initiating, developing or participating in links between the University and external bodies such as business and industry, the professions, community organisations and policy-makers.
- Evidence of successful engagement in teaching or supervision.

4. **Person Specification**

**ESSENTIAL CRITERIA**

1. Normally educated to doctoral level, or other equivalent qualification, or appropriate level of experience, as appropriate to the discipline (see role-specific criteria below).

2. Evidence of engagement in high-quality research activity.

3. Excellent presentation skills, with the ability to communicate effectively, both orally and in writing, with students, colleagues and external audiences.

4. Ability to work individually on own initiative and without close supervision, and as part of a team.

5. Ability to exercise a degree of innovation and creative problem-solving.

6. Excellent organisational and administrative skills.

7. Ability to prioritise and meet deadlines.

8. Excellent IT skills.

**DESIRABLE CRITERIA**
1. Emerging track record of high-quality publications in reputable journals and other appropriate media of similar standing.

2. Experience of generating research or knowledge exchange income.

**ROLE-SPECIFIC CRITERIA**
