307C8 Research Skills in Psychology

Reports 55% and 45% weighted

Convenor: Sue Sullivan

In this module students were asked to produce 2 lab reports (one on the other-race-effect, and the other on the effects of packaging colour on consumer ratings). For the resit, students will:

1. Re-write the report that they received the lowest mark for (from the 2 original lab reports) and they should take into account the feedback from the original submission. – please contact the module convenor for further information

And

2. Students will need to write a second lab report from scratch – please contact the school office for further details of the assessment brief
