

Adrian Chorlton – Transcript – What's your top tip for new researchers?

All Sussex students have free access to Office 365, so that means that you've got access to the full range of Office programmes and that can be installed on your own devices as well as being able to be used on University devices.

So you can install it onto up to five of your personal devices and also five mobile devices and in addition to that you get 1 TB of OneDrive for Business storage space. Obviously you need to make sure you comply with your School's regulations in terms of where the data is actually stored but that is a facility that you can use.
