Multiple-Choice Exam MCQ (70%) - 1 hour 30 minutes:
Students are asked to complete an online multiple-choice exam facilitated via the Canvas module site. 30 minutes extra is given to take into account any technical or IT issues that may arise.

Lab Report REP (30%) - 1,700 words:
The resit assignment will be a structured lab report exercise. You will be provided (via email) with some data in Excel and a description of an experiment that was conducted. You will be required to answer a series of questions. These will include describing experimental hypotheses, graphing key aspects of the data, describing what can be inferred from the graphs, suggesting how the experiment might be improved and making suggestions for future research that might further the original experimental objectives.
