

Sam Knafo is 2014 IPEG Book Prize winner

CGPE member Sam Knafo was awarded the prestigious and highly-competitive BISA IPEG 2014 prize for the best book published on IPE. The judges commended the agenda-setting nature of the book, not least because it takes on perhaps the iconic example of a supposedly free market in action – the era of classical liberalism and the Gold Standard in the 19th century. In particular, Knafo undermines IPE's hardwired assumptions about this period in history through a meticulous, well-organised empirical discussion and via an explicit conceptual disavowal of the notion that liberalism is chiefly concerned with the ideal type of the market. For these and other reasons, *'The Making of Modern Finance'* constitutes an important intervention into a wide range of debates that go beyond the empirical confines of the book – for example, contemporary discussions about neoliberalism, financial governance, and the state-market relationship in times of crisis. Furthermore, its systematic grounding in economic history demonstrates that Knafo is an excellent ambassador for IPE's claim to be an open, innovative and forward-looking discipline.

Other awards for CGPE

Rorden Wilkinson won the *Society of Women in International Political Economy (SWIPE) Mentor Award* earlier this year. He received this award for his extraordinary dedication to mentoring women in the field of IPE.

Julian Germann won the *2013 New Political Economy Graduate Student Essay Prize* for his article 'State-Led or Capital-Driven? The Fall of Bretton Woods and the German Currency Float Reconsidered'.

Changes at CGPE

The Sussex **Centre for Global Political Economy** was established in 2000. Its core research team consists of members of the Department of International Relations working on different dimensions of Global Political Economy along with other selected faculty members at the University of Sussex from Development, Economics, Geography, Politics, Sociology and Anthropology and doctoral students conducting research in GPE.

The Centre's current work covers a number of themes of central importance to the contemporary global political economy including trade and finance; environment and development; labour, gender and social movements.

Our regional expertise includes East Asia, Latin America, Europe, Africa and India and we have partnerships with many research and activist institutions in those regions.
