

Researching Professional Practice

**Monday 10 February / 12-2pm,
Ground Floor Meeting Room, Essex House**

Michelle Lefevre and Chris Hall will facilitate the session focusing on using Conversation Analysis (CA) as an analytic method for researching professional practice. There will be an opportunity to 'have a go' at CA using research data.

Researching Professional Practice provides an opportunity for doctoral researchers, practitioners and academic colleagues to explore the specific and unique dilemmas, challenges and opportunities arising from research conducted in, with and for (but definitely not 'on') professional practice.
