To Celebrate LGBTQAI+ Month,
CHEER presents:

Decolonizing Trans/Gender Studies? Teaching Gender, Race and Sexuality in Times of the Rise of the Global Right?

The object of investigation is 'gender' as a category and 'gender studies' as a field of knowledge. In order to discuss what decolonizing trans/gender studies in Europe could mean, Alyosxa aims to bring different strands together that have been held apart so far: resistance against global attacks on gender studies, resistance against transphobic feminism, and the 'decolonising the curriculum' movement in the UK.
