

Definitions of staff and students

As part of the webform, people are asked to self-report into the following categories;
 Undergraduate Student, PhD or Masters Student, Member of University Staff,
 Member of SEF staff, International Study Centre Student, Contractor and Visitor or Other

We then use the groups as follows;

	Graphs	Includes	Excludes
Student	Data set 1 to 4	Undergraduate Student, PhD or Masters Student, International Study Centre Student. IDS students also fall into this although they don't have a separate drop down option.	BSMS students (these are reported under UoB)
Staff	Data set 1 to 4	Member of University Staff (including BSMS staff)	IDS staff
Contractor	Data set 4 – cumulative table	Contractor	
Visitor or Other	Data set 4 – cumulative table	Visitor or Other	
Member of SEF staff	None.		Not reported on within our figures

General definitions;

Open	Cases that have been reported to us and are within the self-isolation period
Retrospective	Cases that are reported to us after their self-isolation period. These will form part of the cumulative figures.
Closed	Cases that are past the required self-isolation date are considered closed unless an updated form is submitted to extend the period. This could include negative test results as these are closed unless we are advised they need to continue self-isolating (but this is not reported on here).
On campus	Campus managed accommodation – this includes off campus managed accommodation (i.e. Lewes/ Brighton)
Off campus	Non-campus managed accommodation
