Welcome

Leaving home to live at university is an exciting experience, and Sussex provides the opportunity to take those first steps of independent living in a supportive and friendly environment.

Congratulations on securing your place at Sussex. Housing Services have been welcoming students to their new homes for many years and we aim to give you a high level of support to help you to settle in easily and make friends quickly. We are committed to providing you with housing that enables you to make the most of your time at Sussex. We realise that where you live can have an impact on how effectively you can study.

We have a wide choice of housing that helps us to meet most of the needs of our students. If you have been allocated a room you are not happy with, try not to worry about it too much at first. Most students settle into their accommodation quickly, even if it isn’t quite what they wanted, and find they are happy after all. But, if you are one of the unlucky few who really can’t settle, we operate a swap list at the start of the term and will do our best to assist you with this.

Housing Services is located in Bramber House and is the first point of contact regarding housing matters. You are welcome to pop in and chat with the team about any housing issue you may have. Bear in mind that the office is extremely busy during September and it may be difficult to get through at times. However, please persevere and we will do our best to resolve any issue you might raise.

We look forward to welcoming you and hope you make the most of your time with us.

DEAN SPEARS
HEAD OF HOUSING SERVICES

Housing Services

The Housing Services team are responsible for the allocation and charging of all of the University’s accommodation, both on and off campus. Residential buildings are maintained by Sussex Estates and Facilities LLP (SEF).

The Residences Manager has overall responsibility for the residences and each area has its own Building Manager. The building manager is supported by a porter, housekeeping supervisor and a team of housekeepers. The Housing Services team in Bramber House produce information about the residences, carries out the allocation of accommodation and administers the tenancy agreements, as well as providing information about accommodation available in the local private rented sector. The Residential Advisor (RA) network is made up of returning students living in the residences who act as a first point of support for new students (see page 16 for more information on this scheme).

The Head of Campus and Residential Support is responsible for student welfare, disciplinary matters and also manages the RA scheme. He and his deputies are based in the 24-hour Service Centre in York House.

Housing Services is located on the Second Floor of Bramber House. You can speak to a member of the Housing Services team on 01273 678220 (8220 from an internal extension) or email housing@sussex.ac.uk
Living on campus

The residences form an integral part of the University of Sussex. We have just over 5,200 study bedrooms on and off campus, all of which are self-catering and over a third of which have en-suite facilities. How you feel about your accommodation is very important to us. Student tenants are typically young adults, but you will find that some students are here with their families while others have retired and are returning to education.

All study bedroom keys are security coded, meaning they cannot be copied at locksmiths. All study bedrooms and some communal areas have internet (Eduroam) connections and telephone points. It is also possible to connect to the internet wirelessly. Instructions on how to connect and use both systems are available from your Porter.

NORTHFIELD

Northfield comprises 1072 en-suite rooms, 21 studio flats and 12 family flats. In the Northfield Reception Building there is a Social Centre which currently includes: seating areas, two TV’s, a pool table and computer workstations (facilities may be subject change). There is also a separate TV room.

TV/POOL ROOM – NORTHFIELD AND STANMER COURT

The TV and pool room are available to use by residents. There is a 50 inch television with free digital channels and a DVD player, as well as a full sized pool table (games cost 50p). The TV room has both wireless and hard wired internet access.

Please respect the facilities and clear up after yourself. Should any of the equipment be tampered with or vandalised, we may have to close the room for a period of time, affecting all residents.
STANMER COURT

Stanmer Court comprises 463 student study bedrooms and 11 studio flats, all the rooms have en-suite facilities. There is a TV lounge with pool table and 24 hour Reception.

CAR ACCESS FOR STANMER COURT

There is no vehicle access to Stanmer Court other than the welcome weekend 10 and 11 September 2016 8am-6pm, and the departure dates Friday 9 and Saturday 10 June 2017.

SWANBOROUGH

Swanborough comprises 250 rooms arranged as 41 flats, 12 with seven bedrooms, 25 with six bedrooms and 2 with four bedrooms, all with ensuite facilities and communal lounge and kitchen. There are also two adapted flats providing four bed spaces. The adapted flats have motorised doors, lowered wardrobe rails and kitchen cabinets, en-suite wetrooms, emergency pull-cords which connect directly to reception and plug-in points for vibrating fire-alert pillows.

PORTERS

The Porter's hours are Monday to Friday 8.30am-5pm (closed for lunch 1-1.30). They are available to report maintenance faults to and collect mail from. They are an excellent first point of contact and will help wherever possible. Please report faults to the Porter as soon as they arise.

The Manager is responsible for the portering, cleaning and general maintenance of the site. Please go to see them with any problems you might have, and they will do whatever they can to help. Outside of these hours we have a Duty Porter based at the 24-hour Reception in York House, in case you need to report any problems such as faults that cannot wait until the Porter is back on duty. For further information, please refer to the inside back cover.

HOW YOU RECEIVE YOUR MAIL

The mail is usually delivered by 12 noon and your Porter will place your mail into your residence mailbox. Please remember that everyone in your residence has access to your mailbox, so make sure you have discussed whether you are happy for them to pick up your mail. We strongly advise that no money is sent through the post as we cannot be held responsible for items that do not arrive. If you have any important items being sent to you, please use registered post. If the Porter receives any registered mail or packages, they will keep them secure and will place a slip in your mailbox to let you know. Please then bring your ID to your Porter who will get you to sign the mail book and hand you your registered post or package.

If you do experience a problem receiving your mail you can speak to the Porter or Building Manager who may be able to keep your mail separate for only you to collect.

WHAT’S YOUR ADDRESS?

To make sure you receive your mail or packages please use the following address with your full name, room number and postcode:

Residence i.e. Northfield (followed by your flat number)
University of Sussex, Falmer, Brighton, East Sussex
(see tables on pages 5-10 for individual postcode)
What do we provide?

When you arrive you will find a room inventory. You will need to check through the inventory, sign it and return it to the Porter. When you move out, you will be charged for anything that is missing or damaged. Please leave the room as you found it.

**WHAT SHOULD YOU FIND IN YOUR ROOM?**

- Bed and mattress
- Wardrobe and drawers
- Desk and desk chair
- Bookshelves
- Roller blind/curtains
- Desk lamp
- Waste paper bin
- Secure door lock
- Internet point (ResNet)
- Pink cable
- Telephone
- Mirror
- Bedside shelving unit
- Pinboard

**WHAT SHOULD YOU FIND IN THE KITCHEN/COMMUNAL AREA?**

- Oven and hob
- Fridge and freezer
- Kettle and toaster
- Microwave
- Iron and ironing board
- Vacuum
- Dining table and chairs*
- Dust pan and brush
- Mop and bucket
- Easy chairs*
* not available in all residences

**WHAT SHOULD YOU FIND IN YOUR EN-SUITE SHOWER (WHERE APPLICABLE)?**

- Toilet
- Toilet brush and holder
- Wash hand basin
- Mirror
- Shower pod

General instructions on how to use the equipment are contained later in this handbook.

There is limited storage space in the studio flats so we provide you with the ironing board, iron, vacuum, dust pan with brush and mop with bucket in the storage cupboard at the end of end corridor. This are shared so please replace them back in the cupboard after each use.
Information on when and how to pay your rent is provided in your accommodation offer letter. You can pay in full or in three instalments payable on specified dates in October, January and April (for 9-month tenancies). Students with 11- or 12-month tenancies will have an extra instalment payable in the summer. Students who move into their accommodation later in the year, and whose tenancies are for three months or less, will, in most cases, be expected to pay the full amount in advance. Whichever method you use, arrangements must have been made by the time you move into your accommodation. (Overseas students should note that it can take some time to set up a UK bank account and paying by credit card is usually a more viable option.)

You can set up a debit card or credit card payment plan online via Sussex Direct from 1 September. If you have any problems contact the University’s Student Accounts team 0800 849 4979 to give them your payment details, or email studentaccounts@sussex.ac.uk

(Students at the Brighton and Sussex Medical School should call 01273 873799.)

If you start to fall behind on your agreed payments, please contact Student Accounts at an early stage to let them know you are having problems. Students who get seriously behind with their rent are at risk of being evicted from their accommodation.

Your rent includes:
- all utility costs
- internet connection
- telephone service (excluding external call charges)
- bedroom contents insurance
- cleaning of communal areas
- 24-hour porters service in defined areas
- residential welfare support.
RESIDENTIAL ADVISORS

Residential Advisors are returning undergraduate and postgraduate students from the UK and overseas who are placed in the University residences (predominantly in undergraduate areas). Their initial function is to provide useful information to you to settle into your accommodation.

During your first few days in residence, the RAs will introduce you to the rules of communal living, which may involve discussions about kitchen cleanliness, quiet hours or keeping the peace with your neighbours. Any problems concerning the above should in the first instance be referred to your RA.

PEER MEDIATION

Our Residential Advisors are trained in peer mediation skills and will do their best to help you address any issues that may arise in your flat. When addressing conflict in your residence we will endeavour to hold kitchen meetings (peer mediations) either formally or informally to help you find mutually beneficial ways to live communally. Peer mediation is not appropriate in all circumstances and decisions will be made as to its efficacy by the Campus & Residential Support (CRS) Management Team who may decide to utilise another form of conflict resolution which may include but will not be limited to arbitration, disciplinary referral or sanctions. Peer mediation has proved to be a valuable tool to help Residential Advisors assist students in adjusting and compromising in what can be a challenging living arrangement when cohabiting in a communal environment with a diverse community. If you or any of your flatmates need to arrange a peer mediation or report any issues that arise in your flat please contact your Residential Advisor or go to the CRS homepage for further information: sussex.ac.uk/campus-support

Please remember that the residence is the Residential Advisors’ home as well, so be respectful and contact them at appropriate hours of the day.

RESIDENTIAL COMMUNITY COORDINATORS

Each residence will have a designated Residential Community Coordinator (RCC) who will coordinate RA responsibilities in that area. RCCs are based at York House Reception from 10am - 10pm Monday - Friday to provide welfare support to residents. The RCCs also provide out of hours crisis support as outlined below.

CAMPUS & RESIDENTIAL SUPPORT MANAGEMENT

The Campus & Residential Support Team are located in York House. Christopher Tucker, Head of Campus & Residential Support, leads the team and works with partners, including the Head of Housing Services and student services colleagues to provide a continuum of support from across the University, including counselling services, Student Life Centre, International Support and to signpost to other services, including housing, student accounts, and Sussex Estates and Facilities.

The Head of Campus & Residential Support is supported by two Residential Support Managers, Miriam Sharma and Michelle Yembra and the Campus & Residential Support Assistant, Ellie Simpkin.

The Residential Support Managers manage the day-to-day running of the scheme and can be contacted for additional welfare support if needed. Each manager has a different area of responsibility within the residences but any member of the Campus & Residential Support team will do their best to assist you with any support needs you encounter.

Ellie Simpkin is the Campus & Residential Support Assistant and she is the person responsible for the administration of the Residences Schedule a disciplinary procedure.

Contact Campus & Residential Support at campus-support@sussex.ac.uk

OUT OF HOURS SUPPORT

The Residential Community Coordinators along with the Campus & Residential Support Management Team offer crisis support 24/7 for students living in University-managed accommodation, contactable via Security on 01273 87 (3333); Students living in the private sector can seek welfare support at the Student Life Centre during office hours, for out of hours support private sector students can contact JAM, a callback service, on 02089 383873 and will receive a call from one of the Residential Community Coordinators within one hour.
**Housekeeping**

**CLEANING**

Each student is responsible for the cleaning of their study bedroom and keeping the communal areas tidy. However, to keep all the flats to a reasonable standard, we will clean communal areas weekly and your ensuites monthly. You will need to make sure that the surfaces are cleared before the housekeepers arrive.

Please follow these guidelines:

- on cleaning day please ensure kitchens/ bathrooms are left in a satisfactory and clear condition with all rubbish removed
- do your own washing up and clean the cookers after use, place food waste in the kitchen bin and do not dispose of it using the sink or drains
- vacuum dry spillages/mop up liquid spillages on the floor
- empty the rubbish from your bedroom, kitchen and bathroom bins regularly
- Rubbish and Recycling must be removed regularly. Two warning emails will be sent before charging for rubbish removal. In the case of Health and Safety or pest concern one email only will be sent regarding housekeeping staff, these should be made to the Building Manager.

If the flat or room is left in an unsatisfactory state, for example in which the housekeepers are unable to do their job without moving your possessions, the Housekeeping Supervisor will leave an improvement notice. Should we find that there has been no improvement the following week, the Manager will send your flat a final warning notice. This will state that we will remove our cleaning service and replace it with cleaning contractors should the condition of your flat not improve. The cleaning contractors will be instructed to clean your flat and do the washing up, payment for which will be passed onto you.

We do, wherever possible, keep the same housekeeper for each flat; with your assistance they will help keep your flat clean and tidy. We expect our staff to treat you with respect and be treated with respect in return. Should you have any complaints regarding housekeeping staff, these should be made to the Building Manager.

Occasionally, we may need to change the day your flat is cleaned due to sickness, staff training or Bank Holidays. Sometimes we may need to reduce the level of cleaning temporarily, however we will try to keep interruptions to a minimum.

Should you feel that any complaint has not been handled satisfactorily, please contact Nicole Klesser, Residences Manager: sussex.ac.uk/set/services/residences

A service level agreement is available in each flat to let you know what is expected from you and what you should expect from the cleaning service. Every room is inspected each term. You will be advised by email if your room or flat is not satisfactory. You may be charged for extra cleaning during or after your tenancy if the room is not left in a satisfactory condition.

**FOOD SAFETY**

For many of you this will be the first time you have lived away from home. Follow these simple guidelines to make sure the food you prepare for yourself and other people is safe to eat:

- wash your hands before preparing or consuming food
- ensure cuts and open wounds are covered before touching food
- keep all high-risk foods refrigerated eg meat, poultry, fish and dairy products
- keep raw and cooked food separate in the fridge
- wash utensils and chopping boards in between preparing raw and cooked food
- keep hot food covered and do not leave food out, it attracts pests
- ensure hot food is thoroughly cooked
- adhere to ‘use by’ and ‘best before’ dates
- use disposable dish cloths to prevent bacteria from building up and spreading, and
- finally, if you are in any doubt about the safety of the food you are about to eat, throw it out.

**ENERGY EFFICIENCY**

We aim to provide the best energy-saving products for your flats based on budget and durability. All our domestic goods are rated A (except for tumble dryers).

Included in your rent is an allowance that covers the average cost of providing utility services based on the previous year’s expenditure for that residence. Help the University keep its carbon emissions and energy costs to a minimum by being sensible and following good practice with your energy usage.

**HEATING**

The heating is controlled by a thermostat but will only come on from October to 1 May. 6am-11am and 4pm to 11pm should the temperature drop. Bedroom radiators have thermostatic valves and can give you greater control over the heat in your rooms. Each valve can go from 0 to 5 (where 0 is off and 5 the highest temperature). The heating is switched off with the rest of campus around April/May time, weather permitting and we do monitor the temperature. If there is a problem with the heating, electric heaters can be requested from the Porter, subject to availability, however please be aware that these consume a lot of energy.

**WATER EFFICIENCY**

Try to use water efficiently by following these simple tips:

- use the minimum amount of water required when you boil water in saucepans and kettles
- do not leave the tap running while you brush your teeth, shave or wash your hands, as this can waste up to five litres of water per minute
- a four-minute shower uses about a third of the water of a bath. But power showers can use more water than a bath in less than five minutes
- cotton wool and tissues should be put in a waste bin rather than flushed down the toilet
- dripping taps can waste up to four litres of water a day. Please let us know so that we can replace worn tap washers, and
• some of our residences have a dual flush toilet which can save up to 68% more water than standard toilets. There are two buttons, the bigger ones uses more water than the small one. Please use as required. To ensure the bowl is emptied, press down the button for 5 seconds.

LIGHTING
Hallway lighting in most residences is movement-sensitive and will automatically switch off when no motion is detected over a period of time. This time period can be adjusted if you feel that the lights stay on too long, or switch off too quickly, and we can adjust the sensitivity of the sensor if necessary. We supply low-energy bulbs where possible, including some desk lamps. Bulbs for fridges and vanity units can also be collected from your Porter.

RECYCLING
We encourage your to reduce your consumption and recycle cardboard, plastic, tin and glass items where possible. Please check with your Porter regarding location of the recycling bins. Please do not remove the recycling bags from the flat without returning them. Any recycling left in the flat may incur charges for removal.

Place all recycling neatly in each bin and do not leave any lying around. If non-recyclable items are mixed in the recycling bins, all the contents may need to be disposed of in a landfill. The bins are operated in partnership with Brighton & Hove Council who collect weekly. Please do not dispose of glass in the recycling bins after 5pm to avoid disturbing other residents.

Recycling for mobile phones, ink cartridges and batteries is available in all residence receptions. Recycling for garden waste is available in some residence receptions. Recycling for glass in the recycling bins after 9pm to avoid disturbing other residents.

WASTE
You are responsible for removing rubbish from your bedroom and communal areas. There are large bins available in and around your residence for disposing of your non-recyclable waste. The rubbish is collected three times a week. Please make sure that you dispose of your rubbish safely and securely inside the bin. If you leave bags of waste by the bin or leave the bin lid open, then the local wildlife will tear the bags open and leave rubbish lying everywhere.

GROUNDS
We are very lucky that our campus is set in the beautiful South Downs. Please respect this environment by ensuring that any rubbish is disposed of in the many bins around campus. Rubbish such as broken glass, cans and plastics are dangerous to local wildlife and also to the many children who live on campus.

PEST CONTROL
Wildlife may occasionally enter the buildings e.g. flies, spiders, ants, silver fish, lady birds. Most insects are harmless but can be a nuisance. Mice and rats can also be attracted if you leave rubbish or food lying around. If you discover wildlife in your residence please report it to the Porters at Reception. SEF will arrange a visit from a pest control specialist who will determine the treatment required. You will be notified of any treatment schedule. If you think you may have bed bugs, report it asap to the Porters who have an information sheet about how to proceed.

EDUROAM
Wireless and internet facilities are provided in the residences as a campus service rather than a residential service and is therefore not technically part of the rent.

To connect to the internet from your study bedroom, use the cat5e cable provided and follow the instructions provided in your room. It is also possible to connect to the internet wirelessly. Further support instructions are available from the website sussex.ac.uk/its/services/networkandstorage/networkandinternet

Further information is available from your Porter. If you have a problem, please contact IT Services Enquiries in Shawcross 1. Call 28090 or email support@its.sussex.ac.uk

For those students without a computer, a 24-hour computer room is available in York House and Park Village.

TELEPHONES
A telephone is provided in each study bedroom. Your 5-digit extension number should be written on your phone. If this is not the case, your porter will be able to tell you your extension number. Calls to other study bedrooms on campus are free of charge.

For you to receive incoming calls, the caller must dial 01273 62 44 00, then your 5-digit extension.

To make outgoing calls, you must activate an account with a standard calling card available from newsagents and supermarkets. You can get more information on how to set up making external calls from your porter. Leaflets containing PIN numbers and further information are available from our reception areas.

STORAGE
The University is unable to offer any storage provision and will not look after items sent by post from students who have not yet arrived. You can get details of local storage companies from Housing Services.

TELEVISIONS
If you wish to bring your own TV you will need to buy a TV licence. Unfortunately, reception on campus is poor, so you may wish to test the reception in your room before buying the licence.

INSURANCE
Basic contents insurance is included within the rent. Should you have any enquires about what is and is not included, then you should contact Endsleigh insurance on 0870 241 6104. If anything is removed from your room without your permission, please contact Security who will contact the Police, if necessary. We would also ask that you inform the Building Manager, so that they are aware of the incident. Any claims for lost items should be made to Endsleigh. Please always ensure that your room is secure when you leave as failure to do so could result in a claim being rejected.

Email property.claims@endsleigh.co.uk

EMAIL
We will contact you by email wherever possible. Please make sure you check your University of Sussex email account daily.
HOME DELIVERIES
All the main supermarkets will deliver to the campus. However, the drivers will expect you to meet them at their van to direct them to where they should unload the shopping. They will not carry your shopping into your residence or wait if you are not at home during your allotted delivery time. For deliveries to Stanmer Court please ensure drivers are met at Falmer Station to direct them to where they should unload the shopping. All crates must be returned to the driver on the day of delivery and must not be stored in the residences.

MOVING OUT

SWAPPING ROOMS
Your tenancy agreement is for your room only and you should never swap rooms with another student without informing Housing Services, which will then ensure that your Building Manager and Porter are aware. Swapping rooms without telling Housing Services is a serious breach of your tenancy agreement (section 12). Any students found to have done so may be fined and further action may be taken. If you are unhappy with your room allocation, you can put your name on the online swap list which will be available via Sussex Direct in the first week of term to help you find someone to swap with. Once you have agreed to swap rooms with someone, go back to Housing Services together to complete the paperwork. A charge of £26 each will go onto your student account to cover the administration involved.

SUB-LETTING
You must not share the accommodation, sub-let it or transfer occupancy to any person. Unauthorised occupation of the accommodation will be treated by the University as a breach of the tenancy agreement and may incur a fine of £250 as noted in our terms and conditions: sussex.ac.uk/study/accommodation/apply/policies

MOVING OUT BEFORE THE END OF YOUR TENANCY
You have signed a tenancy agreement with the University for a fixed period of time. If you want to leave University accommodation before the end of this period please note, as per the terms and conditions of your tenancy agreement:
1. If you are leaving your room because you are moving to other accommodation outside the University, you will continue to be liable for rent until another suitable tenant (who is not already in University-managed accommodation and meets the agreement of Housing Services) is found for your room.
2. If you are leaving your room because you are permanently or temporarily withdrawing (intermitting) from the University, in most cases your rent liability will end when the room is re-let or at the end of the 4 week notice period, whichever comes first.
3. If you have a tenancy agreement until September and plan to undertake research or to return home to complete your dissertation, please note that you remain liable for rent until the end of the tenancy agreement. You have signed a tenancy agreement for a fixed period of time which means you are responsible for payment of rent until expiry of the tenancy agreement.
4. In all cases, you will be charged £55 to cover the cost of cleaning and re-letting your room. This also applies if your tenancy is terminated under notice.
If you want to terminate your tenancy you should:
5. Go to Housing Services to complete a termination form, giving at least 4 weeks’ notice before the date you plan to move out.
6. Ensure that you inform your contacts of your change of address as any mail received after you move out will be returned to sender.

BUILDING WORKS
As part of the University’s ‘making the future’ strategy, Sussex is undertaking a major programme of development, with new buildings for teaching, research, student residences and social activities planned. This involves both new construction and the sympathetic refurbishment of existing buildings. You may particularly wish to note that works are scheduled to take place behind Brightelm, East Slope and Swanborough. Plans have been advanced for the demolition of a nearby building in order to facilitate the future planned redevelopment of the East Slope area. Although disruption will be kept to the minimum possible, noise and dust are likely to affect flats to surrounding buildings from time to time.

PLANNED WORKS
As part of the ongoing process of refurbishing and upgrading of the housing stock, works may be carried out over the academic year. In all cases where works are planned residents will be advised prior to commencement. We are also required to undertake certain health and safety works and servicing when access to your room may be required. Again, in such cases, advance notice will be given prior to the start of the work. Such operational work is undertaken by Sussex Estates Facilities LLP (SEF) on behalf of the University. Your building management team are part of SEF and work with the University to make your time in residence as pleasant as possible.
Looking for accommodation for next year

The majority of residents will be expected to find their own accommodation for their second and subsequent years. The only exceptions will be those who are accepted onto the Residential Advisor scheme and students who need to stay living on campus for medical reasons. Continuing students who wish to make an application to live in University managed housing due to Reasonable Adjustment will be able to apply following a recommendation by the Student Support Unit (SSU) in conjunction with Housing Services team. Please know that availability is limited and applications must be received by the SSU within timescales published in Spring 2017. Please note that availability is limited.

Housing Services can help students looking to rent in the private sector in the following ways:

- our online database, sussexstudentpad.co.uk, lists properties registered with local landlords. More information can be found at sussex.ac.uk/study/accommodation/off-campus/privately-rented
- together with Sussex Students’ Union we run housing talks and events throughout the academic year. These events help students secure private rented accommodation and help students understand their housing rights. We are keen to promote harmonious living in the communities that surround the University.
- providing a list of local letting agents and information of where else you can look
- checking over tenancy agreements for you and giving you advice about what you are signing
- providing references to your prospective landlord or letting agent.

End of tenancy

At the end of your tenancy you will have to move out. There are no exceptions as the halls are used for conferences and other visitors. We ask that you remove all your belongings, rubbish and recycling from your room and communal areas. Please note that a charge will be made for any rubbish/recycling that is left. We cannot guarantee that any items that are left will be stored. You will be charged for any unreturned keys or damages not noted on your inventory. Should you wish to appeal any charges then please write to the Building Manager via: sussex.ac.uk/sef/services/residences

Accommodation available over the summer

If you need to stay over the summer until early September (or even for a shorter amount of time), then apply for a room with Housing Services in Spring 2018. There is a variety of accommodation available for letting for different budgets and requirements. Housing Services will announce details closer to the time. Please note accommodation can be limited so apply early.

General

The University has a Travel Plan (available on the University transport website sussex.ac.uk/transport) that encourages students to use sustainable methods of transport (public transport and bicycles), instead of private vehicles.

Public transport information can be obtained from the noticeboard at the west entrance to Bramber House (adjacent to the road), the 24-hour Service Centre at York House, National Rail Enquiries (08457 484950 or nationalrail.co.uk), 1 Stop Travel (01273 886200), or the University website at sussex.ac.uk/sef/services/transport

Parking

Students living in University-managed accommodation will not be eligible for a permit to park a vehicle on the campus or in University-managed car parks. The only exceptions will be students with a disability and those in family accommodation. Enforcement Officers have the power to issue Penalty Charge Notices (PCNs) to those who do not comply.

Trains

Falmer Station is connected to the campus by a pedestrian underpass, and trains from Falmer run to and from Brighton and Lewes (travel time approximately 5-10 minutes). These trains usually run four times an hour for most of Monday to Saturday and twice an hour on Sunday. Connections for trains to London and Gatwick can be made at Brighton or Lewes. Please note that the last train in either direction is usually before midnight.

There are a range of different discount schemes available to students, including the Union season ticket, which allows students unlimited travel between Brighton and Falmer. You can purchase a seven-day, one-month or three-month pass from any Southern railway ticket office or 1 Stop Travel shop, on presentation of a valid NUS card.

Other concessionary passes include the Young Persons Railcard, Disabled Persons Railcard and Family Card. Further information can be obtained from the ticket offices at Falmer and Brighton Stations, by visiting southernrailway.com or southernrailway.com/tickets-and-fares/ticket-types/16. Alternatively you can call National Rail Enquiries 08457 484950.

Rail operator Southern has recently introduced new trains on the East/West Sussex and London mainline routes that have a dedicated area for wheelchair users as well as a fully accessible toilet. Train information systems are both visual and audible. For mobility-impaired passengers there is all-over, step-free access at Falmer Station. Call 0800 138 1016 for further information (minicom/textphone: 0800 138 1018).
BUSES

The number 25 and 25X buses travel to and around campus every few minutes from the centre of Brighton & Hove. It also goes on to the University of Brighton’s Falmer campus after visiting the Sussex campus and so is useful for students studying at both Brighton and Sussex Medical School. The number 23 bus travels between the campus, with the furthest stop being at Northfield, and the Royal Sussex County Hospital, ending at Brighton Marina. This runs every 20-30 minutes Monday to Saturday, but does not operate on a Sunday. The N25 night bus operates every 30 minutes between the campus and Portslade Station, stopping at city centre stops in between. It also links to the cross-city night bus N7. This means that there is a 24-hour bus service to most of the city. The 28 and 29 service stops on the main road outside the University, and travels between the city centre and Uckfield, via Lewes.

There are three special ticket deals for students. These Saver tickets give unlimited travel on all Brighton & Hove bus services except night buses N29, N69, N98 and N99. Saver ticket holders can travel on night buses N7 and N25 free of charge.

Student Weekly Tickets, three-month Saver Tickets and annual passes can be obtained upon presentation of a valid NUS card and two passport-sized photographs from 1 Stop Travel offices, which are located at the Old Steine in Brighton and at Brighton Railway Station. Weekly Saver tickets can also be purchased from the Post Office on campus and from Student Union Shops on campus. For further information, please visit buses.co.uk

At present, most buses on the 25 route have access for wheelchair users at stops with raised kerbs. Further information can be obtained from Brighton & Hove Buses on 01273 886200 or info@buses.co.uk

CYCLING

There is a cycle lane between the centre of Brighton & Hove and the edge of Lewes and the University is located halfway along this cycle route. There are more cycle lanes within Brighton & Hove connecting with the route to the University. Bicycles can be taken on Southern trains free of charge, but not at peak times.

Further information on safe cycling, local cycle routes and student discounts on bicycle purchase can be obtained from the transport section of the University website at sussex.ac.uk/transport

ROAD SAFETY

University students have been involved in road accidents in the past so please act on the following advice:

- do not drink and drive
- if on foot, beware of speeding cars
- if on a bicycle or motorcycle, wear a protective helmet at all times and, if cycling, use cycle lanes where available
- always look left, right and left again before you cross the road. In Britain we drive on the left side of the road.

REPAIRS

Sussex Estates Facilities LLP (SEF) are responsible for maintenance, repair and daily operations of the residences. Response times are provided here sussex.ac.uk/sef/services/maintenance.

Please report any repairs to your own area Porter during the week and out of hours repairs to York House Reception on 27020 from your room phone or 01273 678323 from your mobile phone. For Stanmer residents only please contact the porter 24/7 on 01273 678938.

The Porter will endeavour to help you and will carry out minor repairs or pass it on to the maintenance team as needed.

If you report a repair it will be assumed that you have given permission for your room to be entered to carry out the repair.

For planned maintenance, we will give you 48 hours’ notice via email. All contractors/employees will carry ID cards at all times and they will be happy to show their ID if requested. If they do not have any ID and you are concerned, refuse entry and contact the porter immediately.

If we are not able to repair a fault satisfactorily, alternatives will be offered, whether that’s access to other facilities or the option of moving to another room. If you require an update on repairs please contact the Porter or Building Manager.

COMPENSATION POLICY

Every effort will be made to carry out repairs in a timely fashion with the least amount of disruption to you. There are many factors that influence the time it takes to do this; there could be parts on order, personnel sent to a more urgent job, or intermittent faults that keep recurring.

Should you feel that you have been inconvenienced or suffered a sustained loss of services than please refer to our compensation policy: sussex.ac.uk/study/accommodation/apply/policies

As a landlord, the University is allowed a reasonable time in which to attend to repairs, as stated above. In more serious cases, where a maintenance problem culminates in the actual withdrawal of major facilities or services (eg loss of hot water, etc), residents may be eligible for a partial rent rebate if the problem persists for longer than the stated period and no reasonable alternative provision can be made. sussex.ac.uk/study/accommodation/apply/policies/housing-complaints

CONDENSATION

Condensation can be a problem if there is no adequate ventilation or natural light in bedrooms, bathrooms and kitchens. Sustained condensation will leave the plasterboard around windows or in the coldest part of the room damp, which could lead to black mould forming. This can be removed by using a suitable chemical. Prevent condensation by making sure the rooms are ventilated, kitchen and bathroom ventilation fans are used and curtains kept open. Also bear in mind that drying clothes on radiators will put additional moisture in the air and will lead to condensation. Some rooms will have air vents above the windows which should be in the open position as often as possible.
TOILETS
Some toilets are fitted with an environmentally friendly water-saving cistern, which reduces the volume of water flushed. To fully flush the toilet hold the handle down or press the button for a few seconds.

All toiletry and sanitary products (including facial wipes) apart from toilet paper must be disposed of hygienically in a bin and not flushed down the toilet. Contact the Porter immediately if you think your toilet may be blocked.

HOT WATER
In some residences hot water is heated by immersion heaters. The heating and communal area hot water supply are both set by timers. The hot water to bedroom washbasins is available at all times. If you experience any problems with the hot water in your house please report it immediately to your Porter who will be happy to assist.

HALLWAY CUPBOARDS
Inside the hallway cupboard you will find an iron and ironing board, mop and bucket, vacuum cleaner, dustpan, brush and a broom. You can use these to clean and tidy bedrooms, bathrooms and hallways. As your cleaner also uses this equipment please return it to the cupboard after you have used it. We do not provide cleaning supplies for student use, however you can purchase these from the Students’ Union shop on campus.

SINKS
Please do not pour food residue, fat or oil down the sinks as this will congeal and prevent the waste water leaving your building.

HEALTH SERVICES
There is a medical practice located next to Lancaster House offering GP services. You will also find a dentist and pharmacy nearby.

STD AND HIV/AIDS CLINIC
The nearest clinic is located in the Royal Sussex County Hospital, Outpatients Department, at the Claude Nicole Centre, Eastern Road, Brighton. Opening times vary and appointments can be made by calling the clinic on 01273 664721.

MENINGITIS
The symptoms of meningococcal meningitis and septicaemia are not always easy to spot at first because they are very similar to flu. The illness may take one or two days to develop, but it can develop very quickly and sometimes the patient can be seriously ill within a few hours. The symptoms are as follows, but they may not all appear at the same time:
• being sick
• high temperature
• violent or severe headache
• stiff neck
• a dislike of bright lights
• drowsiness and lack of energy
• painful joints
• fits, and
• a rash – tiny spots or bruising under the skin, which do not turn white when they are pressed.

Should you have some or all of the above symptoms, go to the Health Centre immediately. If the centre is closed, contact Security on ext 3333 or see the Night Porter at York House 24-hour Service Centre. Depending on the severity of your symptoms, we will contact an ambulance or arrange for a taxi to take you to the local hospital.

MUMPS
Mumps is a viral infection spread by droplets and saliva through coughing and sneezing. It is less infectious than some diseases, such as rubella and chickenpox, as it requires close contact with an infected person. However, it can cause viral meningitis, permanent deafness and occasionally inflammation of the pancreas and ovaries or testicles.

Again, if you have any health concerns, contact the Health Centre, out-of-hours Security or the Night Porter at York House 24-hour Reception. We will arrange a taxi for you to go to hospital and back, just to be sure.

SECURITY
Security is located on the ground floor of York House and can be contacted on 01273 678234 for non-emergencies and 3333 or 01273 873333 for emergencies only. Security patrol the campus around the clock.

All Security staff are qualified first aiders and can respond quickly to emergencies. If requested they can provide escort facilities after dark for lone students. It is preferable to book this by contacting Security on 01273678234 or contact them on the day if you were unable to book. Security will endeavour to help but please note if they are attending an emergency they may require you to wait if it has not been booked.
PROCEDURE FOR LOST KEYS
If you have been locked out during office hours you can go to the Porter of your residence (you will need ID) who will let you back into your room.
If you have been locked out during out-of-office hours, you can go to the 24-hour reception in York House (you will need some ID) and the Porter on duty will let you back into your room. Stanmer Court residents should go to their reception (not York House).

If you have lost your keys, you must report them as lost to the Porter. You will be supplied with a new key and charged accordingly: £20 for bedroom key, £15 for fob/access card, £50 for replacement lock.

If you have lost your keys, you must report them as lost to the Porter. You will be supplied with a new key and charged accordingly: £20 for bedroom key, £15 for fob/access card, £50 for replacement lock.

If your keys/card have been stolen, you must report this to the police and get a crime reference number.

PERSONAL SAFETY AND SECURITY OF POSSESSIONS
Although the University is patrolled by Security, you still need to be mindful of your own personal safety, both on and off campus.

Therefore, please:
- use window locks, restrictors, door chains, and peepholes where fitted. Report any fault with the above security measures to your Porter as soon as possible.
- if your residence is fitted with an intercom and door entry system, please use this and do not allow access to people who are not known to you.
- keep front doors locked at all times.
- lock your bedroom door and close your window when leaving your room.
- close your curtains at night.
- mark all items of value (e.g., laptop computers, iPods, etc.) with a unique identifier using a security pen.
- exercise caution and keep to footpaths where possible, especially after dark.
- if you have a car, keep it locked and check that all windows are closed. Lock any items of value in the boot where they cannot be seen.
- if you have a bicycle, please make sure that it is secured in a bicycle rack.
- report any incidents, should they occur, and do not walk on the railway line at Falmer Station as lines are live 24/7 and carry 750 volts of electricity.

Call Security on 3333 from any bedroom telephone (or use an emergency telephone) if you need assistance or notice anything suspicious.

EMERGENCIES
In the event of a serious emergency you should contact Security on 3333 on any bedroom or University phone. Tell Security the problem and your location and they will respond. If necessary, they will also contact an ambulance, wait for an ambulance to come onto campus and guide them directly to you.

Do not contact an ambulance directly as they will not know where to go and this could waste valuable time. Security will also complete an incident/emergency form, which a Health and Safety Advisor will investigate and follow up, if necessary.

BANNED EQUIPMENT
The University Safety Committee has banned the use and storage of portable radiant electric fires, gas and liquid fuel heaters, 3 way electric adaptors, chip pans, candles, incense, shisha pipes and joss sticks in the residences, as all these items have caused fires in the past. It is also against policy to store or keep combustible materials such as petrol, paraffin etc in residence – if found they will be removed.

ELECTRICAL SAFETY
To ensure the safety of personal electrical items such as computers, hi-fi, hairdryers, toasters we will arrange for them to be electrically tested. If you have electrical items please ensure they are tested before you bring them onto campus. We will make you aware of any items that fail its test and arrange for its safe disposal. We will remove from site any items we believe to be unsafe.

PROCEDURE FOR LOST KEYS
If you have been locked out during office hours you can go to the Porter of your residence (you will need ID) who will let you back into your room.
If you have been locked out during out-of-office hours, you can go to the 24-hour reception in York House (you will need some ID) and the Porter on duty will let you back into your room. Stanmer Court residents should go to their reception (not York House).

EMERGENCIES
In the event of a serious emergency you should contact Security on 3333 on any bedroom or University phone. Tell Security the problem and your location and they will respond. If necessary, they will also contact an ambulance, wait for an ambulance to come onto campus and guide them directly to you.

Do not contact an ambulance directly as they will not know where to go and this could waste valuable time. Security will also complete an incident/emergency form, which a Health and Safety Advisor will investigate and follow up, if necessary.

BANNED EQUIPMENT
The University Safety Committee has banned the use and storage of portable radiant electric fires, gas and liquid fuel heaters, 3 way electric adaptors, chip pans, candles, incense, shisha pipes and joss sticks in the residences, as all these items have caused fires in the past. It is also against policy to store or keep combustible materials such as petrol, paraffin etc in residence – if found they will be removed.

ELECTRICAL SAFETY
To ensure the safety of personal electrical items such as computers, hi-fi, hairdryers, toasters we will arrange for them to be electrically tested. If you have electrical items please ensure they are tested before you bring them onto campus. We will make you aware of any items that fail its test and arrange for its safe disposal. We will remove from site any items we believe to be unsafe.
Please follow these simple guidelines:

- ensure that all plugs are wired correctly, (ie with the plastic casing of the wire held firmly by the cord grip). Also ensure that all wires and cables are in good condition.
- adapters should not have a trailing lead and should not be overloaded
- 3-way adaptors are banned from the residences. Any 3-way adaptor found will be removed.
- No two-pin or other non-UK plugs to be plugged into the sockets.
- You should not modify or interfere with electrical equipment.

UK voltage is 230 with an AC of 50Hz, most universal adapters work for laptops, iPhones, iPads, etc. An adaptor can be purchased from the Students Union Shop in Falmer House. Most US appliances run on 120 volts and alternate a 60Hz i.e. hairdryers, shavers and hair straighteners and will not work with a regular adaptor so you will need a mini transformer as well. If you find you trip the electric circuits when using any equipment, please inform the porter so that the trip switch can be reset and do not use the appliance again unless you have the correct adaptor or transformer.

FIRE SAFETY

It is important to know what to do in the event of fire. Notices explaining what to do in the event of fire are prominently displayed in all study bedrooms. Fire exits and escape routes (ie landings and corridors in the residences) must be kept clear at all times.

WHAT TO DO IF YOU DISCOVER A FIRE

1. Sound the fire alarm by operating the nearest break-glass unit. When a residence fire alarm is activated, Security and the Fire Brigade are automatically called. The alarm also warns everyone else in the building to evacuate.
2. If you are trained to use a fire extinguisher and/or can tackle the fire without personal risk, then do so. Always remember to leave yourself a clear escape route should the fire get out of control.
3. If someone’s clothing catches fire, get them to lie down as quickly as possible to prevent them breathing in the heat and smoke. Roll them over in blankets, coats or a fire blanket from the kitchen to smother the flames.
4. If you cannot extinguish the fire, ensure the door of the room where the fire is has been closed. This will contain the fire and prevent the smoke entering the halls, corridors or stairways, which other people may be using to escape.
5. Leave the building and move to your nearest assembly point. Notify the Security team of the reasons for the activation if known and await further instruction.

WHAT TO DO IF YOU HEAR AN ALARM

1. Leave the building, if possible, closing all doors and windows behind you, and go to the assembly point. Please note whether your flatmates and/or guests have vacated the building. If anyone is missing, report this to Security or the Fire Brigade when they arrive. Under no circumstances should you re-enter the building until you have been told that it is safe to do so. Do not stop to collect personal belongings.
2. Telephone the emergency number 3333 from another flat or house if necessary or 01273 873333 from a mobile phone, and advise Security of your room number, location and cause of the fire.
3. If you cannot leave your room because the corridor is full of smoke, the safest thing to do is to go back into your room, shut the door and place a wet towel or blanket at the base of the door. Next, go to the window and try to attract attention. Do not break the glass.
4. If you are not on the ground floor, do not get out of the window or jump. Generally, you will be in more danger from your fall than from the fire.
5. If your room becomes smoky, the air will be cleanest and coolest near the floor, so lie there until help arrives and then let them know where you are. Remember never put yourself or others at risk – if in doubt always evacuate.

In each of the residences we have automatically-activating fire detectors fitted. These are:
- heat detectors, activated solely by a dangerous rise in temperature, sited where there is likely to be smoke, steam or dust, eg kitchens, near bathrooms, or in workshops, and
- smoke detectors, which are much more sensitive, are sited in ‘clean’ areas such as bedrooms and corridors.

By far the most common reason for a fire alarm sounding is when fumes, steam or smoke from cooking activate a smoke detector. This will result in a member of staff or SEF staff attending and, in some cases, also the Fire Brigade.

Therefore, in conjunction with the Fire Brigade, we would ask that you do following:
- keep kitchen doors and corridor doors closed when you are cooking. Doors automatically close and must not be wedged open
- use extractor fans, if available, when cooking
- if your cooking does create a lot of steam or smoke, avoid opening the kitchen door until it has dispersed
- if you burn your food, do not take it out of the kitchen whilst it is still smoking
- if you have a bath or shower, avoid opening the bathroom door until the steam has dissipated
- do not use aerosol sprays or anything that will create dust near a detector, and
- under no circumstances should a detector be tampered with or covered.*

* Students who have been found to have tampered with or covered the smoke detectors are liable for a fine of up to £250.

FIRE DOORS

Flat entrances, kitchen doors and bedroom doors are fire doors and must not be propped open at any time. In some residences the kitchen door is fitted with an alarm that will sound if the door is left open too long. The alarm will stop when the door is closed. In other residences there is a magnet holding the outer kitchen door open which will close automatically upon a fire alarm activation. These doors must not be propped open.

WINDOWS

Most windows are restricted for your safety, any room found to have the window restrictors tampered with in any way will result in disciplinary action being taken against the occupant. You will be charged for any damage to windows due to the restrictors being forced.

Students living on the ground floor are reminded to keep their windows shut when not in their room. Any person found climbing through a window will be reported to Security.
The following is a list of current safety tests scheduled every year:

- fire equipment tests – an engineer will check all the fire-fighting equipment, extinguishers, fire blankets and emergency lighting to make sure that it is all in date, present and in good working order
- fire alarm tests – every week an engineer will set the fire alarm off for a few seconds. This is to check that the system is working correctly by priming different locations in each building
- fixed electrical appliance testing – every five years all electrical sockets are labelled and checked for compliance
- portable appliance testing – all University equipment is tested to ensure that it is in good working order and that there are no electrical shortages or frayed cables
- gas boilers are serviced and safety-checked annually
- legionella testing – samples of water are regularly tested for legionella bacteria. Areas that are most likely to harbour the bacteria are also cleaned, eg shower heads
- smoke heat detector testing.
ILLEGAL DRUGS POLICY

1. The University takes all reasonable measures within its powers to discourage the use of illegal drugs among residents and guests. Students are reminded that possession of illegal drugs is a criminal offence and that possession with intent to supply is a more serious offence. It is an offence to knowingly permit illegal drugs to be used on one’s premises; both staff and the University are legally bound to inform police if they become aware of illegal drugs being used on University property.

2. It is policy not to tolerate the use or possession of illegal drugs on University premises, including owned and leased housing off campus. Students found to be using, dealing or in possession of any illegal drug, including cannabis, will be reported to the police and undergo disciplinary action by the University that could result in them being fined and/or excluded from University and may be required to leave their accommodation with four weeks’ notice and will not be granted references or permitted to live in University-managed accommodation for the remainder of their time at University.

3. The University reserves the right to enter the common areas of the residence to carry out testing for illegal substances. The University will also inform the police of any student suspected of dealing, using or possessing illegal substances.

4. Students are reminded that the possession of cannabis is still a criminal offence.

ALCOHOL AND ANTI-SOCIAL BEHAVIOUR POLICY

1. The University recognises that moderate use of alcohol plays an enjoyable role in the social lives of many students. Abuse of alcohol by a minority can, however, be both damaging both to those students themselves and to those who live and work alongside them.

2. All incidents of anti-social behaviour will be investigated fully and students who are found to have behaved in an anti-social manner may be subject to the internal disciplinary procedures which may result in a fine, the issue of a notice to quit the accommodation, and/or exclusion from the University. Serious breaches of behaviour, including criminal behaviour, will be referred to the local police.

3. While it is recognised that major offences are often committed while under the influence of alcohol, students should be aware that the University does not regard drunkenness as reducing the gravity of such offences.

VANDALISM

Should we need to make repairs due to vandalism, we will charge the resident responsible. Where we do not know who the culprit is and all reasonable investigations fail, the charges will be divided between the residents.

THREATENING OR VIOLENT BEHAVIOUR

We do not tolerate any threatening or violent behaviour to another resident or member of our staff. Should you have concerns, please contact your RA or, if it is more serious, Security or the Night Porter. We encourage all students to report severe instances of threatening or violent behaviour to the police directly (via 24 hour security if on campus).

Examples of threatening or violent behaviour include:

- Intimidation such as shouting or swearing
- Threatening behaviour in the form of verbal, gestures and obstruction etc
- Threatening letters, text messages or emails
- Possession of any weapon, regardless of the lack of any overt threat to use it
- Being incapable while under the influence of drink or drugs
- Any unwanted physical contact
- Personal insults
- Racial harassment
- Sexual harassment
- Harassment on the grounds of disability, and
- Bullying.

BICYCLES

Bicycles are not allowed inside the residences for health and safety reasons. Bike racks can be found close to all residences and you are advised to use a sturdy chain and lock for security. Please note bicycles are left at the owner’s risk.

NOISE

Because our residences are mainly occupied by young people living away from home for the first time, noise can be a problem. All tenancy agreements state that tenants must not do anything in the room or building which ‘is, or may be, a nuisance or annoyance (especially by making a noise) to any other resident or any neighbours’. The University aims to take a robust approach towards students who persistently annoy their neighbours by making an unreasonable amount of noise, and will proceed with disciplinary action, which could result in a fine being levied, and possible eviction.

ACCESS TO ROOFS

For safety reasons roofs may not be accessed under any circumstances. Any person climbing onto a roof or accessing a roof through a window will be reported to Security.

SOCIAL MEDIA – PUBLIC ORDER

Please note that any gathering organised in the residence will be the direct responsibility of the hosts or tenants living in the accommodation. We discourage any type of gathering arranged via social media as these events can quickly escalate in scale and size. Any residents found to have organised such a gathering will be sent through the University discipline process for public order violations and charged for any damage, clean up and associated costs attributed to the event.
GUIDELINES FOR HARMONIOUS LIVING

Honesty, consideration, mutual respect, discussion, compromise and understanding are key in learning to live with your flatmates:

- talk to your flatmates
- set ground rules
- discuss personal habits, sleeping schedules, musical tastes, needs, wants and expectations
- seek help if a difficulty does arise between flatmates. Contact the Residential Advisor or the Residential Student Support Manager. They will help to facilitate communication and attempt to bring about a resolution
- try to be accepting and understanding of alternative lifestyles
- plan in advance for overnight guests, and be considerate
- keep accurate records of all bills that you share
- replace or return something broken or borrowed
- make an effort to keep your living space clean, comfortable and pleasant. The more liveable your space is, the happier and more productive you will be
- don’t pretend that everything is fine if it’s not
- don’t play practical jokes. The intent may be misunderstood
- don’t think problems are going to go away by themselves. Address noise complaints from the beginning, do not wait until the problem is unbearable, and

Where appropriate, the Housing Services team is able to offer a peer mediation service for students who seek assistance in resolving conflict or arbitration in cases where University policy has been broken (conducted by the Head of Campus and Residential Support). Please contact your RA in the first instance.

Your Residential Adviser can also arrange rotas to cover some household chores.

HEALTH AND SAFETY AND MAINTENANCE INSPECTIONS

We inspect all communal areas and bedrooms once a term. Following these inspections the porter or handyman may visit without notification to carry out repairs on defects noted during the inspections. You are not required to be present for the visits, but should you have any issues that you wish to bring to our attention, just leave a note on the dining table or noticeboard, or email your building manager. All bedrooms and kitchens will be inspected and residents may be issued with a notice if it is felt that standards of cleanliness are poor.

GUESTS

You are allowed to have guests overnight in your room on an intermittent basis. This should be for no more than three nights in any one week and agreement from your housemates should be sought in advance.

Please note: All guests must sign the guest register available at reception. Guests can stay a maximum of three consecutive nights. You are responsible at all times for the conduct of your guests.
## Problems and complaints

**QUICK GUIDE**

We hope you will not have problems or cause to complain while living in the residences but, if you do, see below for a quick guide of who to see in the first instance. If your problem is not resolved and you wish to make a complaint, please complete the online complaints form at [www.sussex.ac.uk/study/accommodation/apply/policies/housing-complaints](http://www.sussex.ac.uk/study/accommodation/apply/policies/housing-complaints). In all cases, you should receive a written acknowledgement of your complaint within five working days and an indication of what action (if any) is to be taken.

Very occasionally, you may feel that we have been unable to deal with your complaint adequately and you may wish to use the University’s formal complaint procedure ([sussex.ac.uk/governance/complaints](http://sussex.ac.uk/governance/complaints)). Your complaint would then be forwarded to the Head of Student Support who would investigate the matter independently. In order for your complaint to be properly investigated it is essential that you are specific about the cause and nature of your complaint. You should present full details, including your name and term-time address, and include all relevant documentation. You should detail what attempts you have already made to resolve the complaint, and state what remedy you are seeking.

**CODE OF PRACTICE FOR THE MANAGEMENT OF STUDENT HOUSING**

The University has signed up to the Universities UK Code of Practice for the Management of Student Housing and will ensure that management practices and procedures comply with this code. The full Code is available to read online at [thesac.org.uk](http://thesac.org.uk).

### Problems and complaints

<table>

### Charges

In the past, it has unfortunately been necessary to charge some residents for damage or missing items, which cannot be classified as ‘fair wear and tear’. Please note that the original condition of your room/flat, which varies from area to area, will be taken into account and you will not be charged for any inherited defects which you note on your room inventory.

For information, the current charges are shown below (a minimum charge of £5 applicable to all charges):

<table>
<thead>
<tr>
<th>Charge</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dirty bedroom</td>
<td>£40</td>
</tr>
<tr>
<td>Dirty ensuite</td>
<td>£20</td>
</tr>
<tr>
<td>Dirty communal area</td>
<td>£10 per tenant or minimum of £50*</td>
</tr>
<tr>
<td>Other cleaning</td>
<td>at Building Manager’s discretion</td>
</tr>
<tr>
<td>Replacement locks</td>
<td>£50 towards the cost</td>
</tr>
<tr>
<td>Replacement keys</td>
<td>£10 for mailbox, £20 for front door key (Access card TBC), £15 for fob, £15 for Salto access fob, £20 for bedroom key, £20 for flat key</td>
</tr>
<tr>
<td>Carpet burns</td>
<td>£50 per small burn, £60 for larger burns (ie curling tongs), £100 for large burns caused by irons etc, the cost of replacing ruined carpets**</td>
</tr>
<tr>
<td>Carpet cleaning</td>
<td>cost of cleaning</td>

<td>£250 (for malicious calls only), plus any charges levied by the Fire Brigade</td>
</tr>
<tr>
<td>Using fire extinguishers unnecesarily</td>
<td>Cost of replacement or refilling</td>
</tr>
<tr>
<td>Covering smoke detectors</td>
<td>University disciplinary action which could lead to a fine of up to £250</td>
</tr>
</tbody>
</table>

---

* If, after two warnings, a kitchen is still dirty, students will be charged the full cost of contract cleaners.

** Costs take account of the depreciation in value of a particular item before being damaged.

*** Sundry equipment includes such items as: desk lights, lampshades, waste bins, doormat, fire blankets, kettles and kitchen equipment, irons, ironing boards, shower curtains and mats, etc.
How to use the equipment provided

IRON

1. Plug the iron into a socket where you can conveniently place an ironing board next to it without obstructions or over stretching the cord.
2. When you are ready to start ironing, switch the plug on at the wall and select the temperature setting on the iron depending on the label instructions in your clothes.
3. Flatten the clothes onto the ironing board and use a smooth to and fro action to iron the item without pressing hard.
4. After completing the task, switch off and unplug the iron from the wall and leave to cool down in an upright position before winding the cord or storing.

USEFUL TIPS

• Check the labels on each item of clothing you are ironing and adjust the settings on the iron according to the type of fabric.
• Never place a hot iron face down on any surface other than the ironing board or you will be charged for the damage caused.

HEALTH AND SAFETY – IMPORTANT

• Do not use if any part of the appliance is damaged. Check that the casing and plug is intact, that there is nothing burnt onto the sole plate and that the cord is not frayed.
• Always fill the water for steam into the iron before you plug it in.
• Do not test the iron with your fingers and do not point the iron at yourself or anybody whilst using the steam function.

ENERGY EFFICIENCY

• Gather and prepare all the clothes you need to iron first before starting the task.
• Do not use iron on wet clothes as this will waste energy, only use on dry or nearly dry items.

KETTLE

1. Switch the plug off at the socket and remove the kettle from the base or unplug the power cord from the kettle and open the lid to fill the kettle to the desired amount using cold water, close the lid back completely.
2. Plug the power cord back into the kettle or place the kettle back onto the base and switch the plug back on at the wall socket and then switch the kettle on.
3. The kettle should automatically stop once water is boiled provided the lid was closed correctly.
4. Once the water has stopped bubbling, remove the kettle from the base or the power cord and pour the hot water carefully through the spout.

USEFUL TIPS

• Clean and rinse out the inside of the kettle and the filter regularly to remove the lime scale.
• Do not use the kettle for any purpose other than to boil clean water for beverages or cooking.

HEALTH AND SAFETY – IMPORTANT

• Do not put your hand in the steam as this is very hot.
• Always make sure the lid is shut tight before switching the kettle on or whilst pouring hot water.
• Do not over fill the kettle above the maximum level.
• Do not under fill below the minimum level.
• Do not immerse the whole kettle in water or get the electrical parts wet.

ENERGY EFFICIENCY

• Only boil the correct amount of water you need for the purpose (no less than the minimum or more than the maximum allowed).
• If the kettle is clogged with lime scale it will take longer to boil and use up more energy.
1. Read instructions on your food packaging or the microwave manual if you have it.
2. Place your food in the microwave on a microwaveable plate or dish if you keep it in the original microwaveable packaging.
3. You can use one of the following containers to cook with:
   - oven glass
   - ceramic
   - pottery
   - heat resistant plastic
   - glass
   - microwave bags
   - boil in the bags
   - small casserole dish (used with a lid or kitchen paper).
   Do not use the following:
   - Metal containers or anything with a metal trim, i.e. roasting tins, saucepans, foil containers as this will cause the microwave to blow up.
4. Select the correct level and time setting and press start.

**USEFUL TIPS**
- Always clean the microwave interior after every use.
- Always use microwaveable plates or containers.
- Microwave cooking and thawing can take minutes rather than hours
- Cover the food, as small items may dry out.
- It is important to remember that food continues to cook for a short time after you have removed it from the microwave. It is therefore recommended that food is allowed to sit for 1-2 minutes before serving in order to ensure that the cooking process is complete, this is called the “standing time”.
- If you do not have the cooking instructions you need to determine whether you are reheating food or cooking an item from raw. Reheating takes less time than cooking from raw and you need to estimate the weight of the food as to how long you need to cook it for. If you are not sure if the item is not hot enough or cooked, test carefully using a knife and fork into the centre of the food to see if steam comes or look at the colour and texture of the meat. Do not eat anything that is not fully heated or cooked, stir the food if possible and continue to cook.

**HEALTH AND SAFETY – IMPORTANT**
- Don’t put metal objects or tin foil in the microwave as this will cause it to short circuit or blow up.
- Do not switch the microwave on with nothing inside it. It is recommended that you place a small cup of water inside the microwave in case it is accidently switched on.
- The amount of food impacts on the time it takes to cook, if you are cooking large amounts make sure that it is hot throughout before consuming.
- Use microwaveable lids instead of cling film as this can bubble and cause steam burns.

**ENERGY EFFICIENCY**
- In comparison to a conventional oven, microwave cooking uses up less energy and there are also less pots to wash up.

---

**TOASTER**

1. Ensure the plug is switched on at the wall socket and place the bread into the toaster and select the setting you require using the dial. The higher the number on the dial the longer the bread will be toasted and the darker it will be.
2. Push down the lever to begin toasting. Use the cancel button to stop toasting at any time (i.e. do not try to force the lever back up).
3. Once the bread has popped up remove it safety by pushing the eject lever upwards to elevate the bread more, do not put your fingers or any other utensil inside the toaster.

**USEFUL TIPS**
- Clean the removable crumb tray regularly to prevent build-up of crumbs that may burn and set off fire alarms.
- You can toast other products such as bagels, pitta bread and tea cakes but you must make sure that the items are cut to size if they are too big to fit the slots, otherwise they will get stuck and burn.

**HEALTH AND SAFETY – IMPORTANT:**
- Never place any metal objects into the toaster to remove any food items that have got lodged inside, this can potentially cause electric shock. To remove an item stuck in the toaster, unplug it from the wall and use a utensil that does not conduct electricity (i.e. plastic) to pull it out gently or shake the toaster gently upside down.
- Always refer to cooking guidelines and do not overcook anything as this can lead to smoke detectors being triggered or fires, never leave any cooking unattended.

**ENERGY EFFICIENCY**
- Using an electric toaster to toast bread is more energy efficient than using the grill in your oven as this takes a long time to heat up.

---

**VACUUM CLEANER**

1. Unwind the whole length of the power cord and plug it into a conveniently located socket and clear the area you will be vacuuming.
2. Make sure all hose attachments and the brush head are secure and there is a bag in the machine before you switch it on at the wall socket and at the machine.
3. Vacuum using a smooth to and fro action, DO NOT press down onto the floor and do not run over the power cable with the appliance or the brush head.
4. Once finished, switch off at the machine and unplug machine. Wind the cord in or around the machine making there are no kinks or knots.

**USEFUL TIP**
- If the vacuum stops working efficiently, let the porter know as the bag may need replacing (in off campus properties you need to replace the bag yourself).

**HEALTH AND SAFETY – IMPORTANT**
- Do not attempt to vacuum liquids as this can cause the machine to blow or cause an electric shock. If you have vacuumed liquid you must report it to the porter straight away and do not let anyone else use the machine.
- Do not attempt to vacuum sharp debris or large debris as this can cause the machine to block up or malfunction.
- Make sure you unwind the whole length of cable before vacuuming or it will overheat and cause the machine to trip out a fuse.

**ENERGY EFFICIENCY**
- Make sure the bag is not full otherwise the machine will be less efficient and will take longer to vacuum the debris and overheat the machine.
FRIDGE AND FREEZER

1. Store your food according to whether it requires chilling or freezing. Always close the door fully after each use.
2. Adjust the temperature dial according to the level of coldness you require. The dial usually needs to be turned up fully (coldest) in the height of summer.
3. Store vegetables and undressed salads in the drawers provided as these will keep fresher in these.
4. Always discard old or rotting food and clean the shelves regularly.

USEFUL TIPS

- The fridge/freezer will only remain cold when switched on at the plug.
- Always clean inside your fridge to keep it hygienic – Christmas and Easter vacations can be good times to defrost and clean the fridge/freezer.
- Keep a 2 inch space at the back of the fridge or freezer to allow the air to circulate otherwise the food will not remain cold.
- Don’t allow ice build up in the freezer as this may cause the trays or drawers to break.

HEALTH AND SAFETY – IMPORTANT

- Do not overload the fridge as this will prevent enough cold air to circulate which causes condensation to build up leading to leaks and also “warm” spots, which will not keep your food fresh.
- Discard of any food that has gone off, pass their sell by date or if there is unusual mould forming as they can cause food poisoning.
- Do not contaminate raw meats with cooked food or vegetables, it is better to place raw meats on the lower shelves so that blood or liquids do not drip onto food below.

ENERGY EFFICIENCY

- If the fridge or freezer is near empty, you can save energy by inserting some empty cardboard boxes to take up the space where normally the cold air will need to fill.
- Try to avoid opening and closing the door to stop warm air getting in and do not put warm food into the fridge, wait until it has totally cooled down first otherwise this will use up more energy.
- To save energy you can defrost frozen food in the fridge compartment earlier so that the cold air can be used to cool the fridge.

COOKER (OVEN/HOB/GRILL)

The majority of cookers are electric but there are some gas cookers in some of the off campus properties.

ELECTRIC COOKERS

1. Select the correct cooking pan or pot and place it on the ring best suited for the size.
2. Switch on the socket at the wall and switch the ring on by turning the corresponding control knob to the desired setting, normally ranging from 1-6, 1 being the lowest and 6 being the highest temperature.
3. After cooking always remember to turn the knobs off and switch off the appliance at the wall socket.

USEFUL TIPS

- Always clean the oven and the hob after every use (whilst cooker is cold and is switched off).
- Do not try grilling or roasting anything without a baking tray or tin.
- Do not return a pot or pan back to the hob if it is empty as the electric ring may still be hot and burn the remaining food.

ENERGY EFFICIENCY

- Only use the correct ring for the correct pan size, there is no point putting a small pan on a large ring and this will waste energy.
- You should also use a lid to cover you pans during cooking to speed up the cooking process. When you food is nearly ready you can switch off the electric ring about a minute or two before as the element will still retain a lot of the heat.
- Boiling water in a kettle uses a third of the energy used if you were boiling the same amount of water on the electric hob so it is more energy efficient to transfer boiled water into a saucepan for cooking.

COOKER HOOD AND EXTRACTOR FANS

Not all residences have extractor fans for removing cooking fumes, some off campus residences have them and models vary.

COOKER HOODS

1. Ensure that the switch labelled Cooker Hood is switched On at the wall socket. The light on the top of the switch will turn on.
2. Pull out the cooker hood door using the handle. There should be switches inside on the control panel with the different settings, one maybe for the light and the others are for the fan which may have a choice of varying speeds.
3. Select your speed and keep switched on for the duration of your cooking.
4. Switch it off and close the door after each use.

CEILING EXTRACTOR FANS

1. Ensure that the main switch labelled Extractor Fan is switched On at the wall socket. The light on the top of the switch will turn on.
2. Pull the cord once for the slower speed and pull again for the faster speed.
3. Keep the fan on for the duration of the cooking and then switch off by pulling the cord again.

USEFUL TIP

- To prevent oil and fumes evaporating into the air use a lid or oil splatter guard over your pan.

HEALTH AND SAFETY – IMPORTANT

- Beware of dripping oil from the unit, this means that the filter is full and needs renewing so notify your porter straight away.

ENERGY EFFICIENCY

- Extractor fans are used to eliminate food odours and extract oil particles from the air. If your cooking has no oil or odours you do not need to use the extractor and it will be more energy efficient to open a window to let steam out.

PORTABLE HEATER

1. For the portable heaters, plug the heater into a socket where you can conveniently place it on the floor or on a table without stretching the cord or causing a trip hazard. Leave a clear space all around it.
2. Point the heater towards the centre of the room and move anything that is obstructing the front out of the way.
3. Switch the plug on at the wall and turn the heater onto the desired heat setting. Some heaters may oscillate too, if so, move anything out of the way from the direction of flow.

USEFUL TIP

- Some portable heaters have a cool fan setting for the summer.
HOW TO USE THE EQUIPMENT PROVIDED

HEALTH AND SAFETY – IMPORTANT

- DO NOT cover the radiator/heater or place any objects in front of it whilst in use.
- Do not keep switch on for long periods of time during the night whilst sleeping as this will dry out the air and dehydrate you.

ENERGY EFFICIENCY

- Switch off heater when you are away for a long length of time or turn down low to keep an ambient room temperature.
- Keep windows and doors closed to contain the warmth.

ELECTRIC COOLING FAN

1. Plug the fan into a socket where you can conveniently place it on the floor or on a table without over stretching the cord or causing a trip hazard. Leave a clear space all around it.
2. Point the fan towards the centre of the room and move anything that is obstructing the front.
3. Switch the plug on at the wall and turn the fan onto the desired fan speed. Some fans may oscillate too, if you choose this setting, move anything out of the way from the direction of flow.

USEFUL TIPS

- Close the blinds or curtains to keep your room cool during the day.
- Open windows and doors to let air ventilate the room.

HEALTH AND SAFETY – IMPORTANT

- DO NOT cover the fan or place any objects in front of it whilst in use.
- Do not use the fan if the safety guard is loose or off, if so, return it to the porter.
- Do not hold the fan but place it on a clear flat stable surface.

ENERGY EFFICIENCY

- Switch off the fan when it is not required or you are not in the room for any length of time, fans are only good for cooling the immediate area, they are not like air conditioning which maintains the room temperature.

DEHUMIDIFIER

Sometimes you may be issued with a dehumidifier to extract moisture from your room. This could be following a leak or if your room is damp. The porter will carry out the initial set up but you will need to help manage the use of it by emptying the water from time to time.

1. Plug the dehumidifier into a socket where you can conveniently place it on the floor without over stretching the cord or causing a trip hazard. An extension cord will be provided if necessary. Leave a clear space all around it. Since the dehumidifier draws air through the machine to remove moisture, it must be located in an area that will not hinder airflow.
2. Point the dehumidifier towards the centre of the room and move anything that is obstructing it out of the way, allow at least 8 inches of space from other objects. Do not place the front of the dehumidifier next to a wall, furniture or any appliance.
3. Switch the plug on at the wall and turn select the correct settings on the appliance. The lower the humidity setting, the more moisture is removed from the air. If the sensor detects higher humidity in the air than the setting requires, the dehumidifier will turn on. Once the room humidity dips below the setting level, the machine will turn off.
4. In addition, some dehumidifiers have a continuous option. When you choose the continuous option, the dehumidifier will run constantly.
5. As moisture is removed from the air it collects in the water tank located in the front of the machine. Once the water level is at a certain level, the dehumidifier will stop running. To empty the water tank, switch the machine off, slide the tank out from the front of the unit and pour the contents in a sink. Slide the empty water tank back into the dehumidifier and switch back on to resume normal operation.

USEFUL TIPS

- The porter will return to your room daily to check on the progress and remove the dehumidifier when drying process is complete.
- Close all windows and doors whilst the dehumidifier is in use to stop moisture being drawn from other areas.
- If your room has a sink/en suite facilities, make sure the sink is plugged and doors are closed.

HEALTH AND SAFETY – IMPORTANT

- Do not cover the dehumidifier or place any objects on it whilst in use.
- Do not keep the dehumidifier on whilst you are asleep as this will dry your nose and throat you may feel unwell in the morning.

ENERGY EFFICIENCY

- During the drying process do not leave glasses of water, open bottles or vase in the room as the water will be drawn from these and energy will be wasted.

DESK LAMP

1. Plug the lamp into a socket where you can conveniently place it on the desk or table without over stretching the cord or causing a trip hazard. Leave a clear space all around it.
2. Move the flexible arm and point the lamp towards the item you wish to illuminate moving anything that is obstructing the light out of the way.
3. Switch the plug on at the wall and switch the lamp on either at the base of the lamp or on the flex.

USEFUL TIP

- Energy saving bulbs may take a bit longer to reach its maximum brightness.
**EXTENSION LEADS AND PLUGS**

The University may provide you with an extension lead if they need install an temporary item of electrical equipment in your room or flat i.e. dehumidifier. We may also swap your existing 3 way adapter plug with a surge protector as these are banned because they are not safe. If this is the case we will confiscate the plug and provide you with a surge protector for a charge of £5.00.

N.B: These types of adapters shown opposite are banned from the residences and will be removed if seen on the inspections.

1. Plug the extension lead into a socket placing the unit conveniently on the floor without over stretching the cord or causing a trip hazard. Leave a clear space all around it.
2. Plug your electrical items into the unit (again without overstretched the cord or causing a trip hazard) and switch the plug on at the wall and then switch your equipment on as required. Some units have individual switches on the strip which means you can switch items on and off individually.

**USEFUL TIPS**

Some equipment like phone or laptop chargers still use up energy when left plugged in but not in use. You can tell if it’s using energy as it will be warm/hot to the touch, the best thing to do is always unplug anything that is not in use.

**HEALTH AND SAFETY – IMPORTANT**

- Do not cover the unit with anything or spill water on it.
- Do not overload the unit by plugging other adaptors or extensions into it.
- Always switch the equipment off before unplugging anything.

**ENERGY EFFICIENCY**

Always unplug or turn off any equipment which is not in use.

---

**FLAT/HOUSE THERMOSTATS**

The main thermostats are located in either kitchens or hallways. The heating in the residences is set to a timer but to activate the heating during this period you must ensure to turn the dial on the room thermostat until you hear a click which indicates the heating will be turned on. To regulate the temperature in your room you can adjust the radiator thermostats.

**CARBON MONOXIDE DETECTOR**

A carbon monoxide detector will be installed anywhere where there is a gas appliance present. The models vary, some can last up to 5 years but all are checked every 3 months for operation and replaced when necessary.

1. To test the detector you press and hold down the test button until the unit starts to sound. The beeping should last a few seconds which means it is working fine. If it doesn’t sound then notify the porter who will test and replace it as necessary.
2. If the detector starts to beep intermittently this means that the battery is running out, notify the porter who will change it for a new one.
3. If the Carbon Monoxide Detector is sounding continuously you must open all windows in the immediate area for ventilation and make sure you and your housemates evacuate the property immediately. Call Southern Gas Networks on 0800 111 999 or notify the Porter or Security Office 01273 678234 straight away.

**USEFUL TIPS**

- For the hot water the timers are set to CONSTANT as it is more energy efficient to keep the water at a constant temperature then to let the water go cold and keep reheating it if the water is in constant use.
- For the heating the timers are set to come on the same times as the district heating on campus to maintain energy efficiency.

---

**HOW TO USE THE EQUIPMENT PROVIDED**

**WASHING MACHINES**

1. Place the correct load of clothes into the drum of the washing machine and close the door until there is a click. Check the maximum load limit for the machine and do not exceed this limit.
2. Place the correct amount of detergent into either the drawer or into a ball into the drum of the machine depending on the form of detergent (read the instructions on the package). Please note that some liquid tablets can be put directly into the drum of the machine and also you need to put the correct detergent type into the correct compartment of the drawer i.e. pre wash, washing powder, fabric softener etc.
3. Close the draw and door fully before selecting the correct settings for your clothes and press start.
4. When the washing has completed the cycle wait a future 3 minutes before opening the door. The door mechanism will only be released once the cycle has completely finished, do not force open the door.

**USEFUL TIPS**

- Do not force open the door of the machine, wait 3 minutes after the cycle has completed fully before trying to open it. If the door seems to be stuck or will not close, inform the porter.
- Please remove laundry from the washing machines once the cycle is complete so that other housemates can use the machines.

**HEALTH AND SAFETY – IMPORTANT**

- Remove any objects from pockets before washing as these may damage or break the machine and may also tear or damage clothing.

**ENERGY EFFICIENCY**

- All new machines purchased will either be A or AA rating, these are more energy efficient.
- Save up clothes to wash in one big load (that does not exceed the maximum) rather than small loads as this will save energy and water. If you have a “eco cycle” function, using this will save water and energy.
- If you are washing half a load use the half load or reduced time function.
- Spin dry the clothes at the highest speed possible for your garments so that energy can be save from the drying process.
- Washing clothes at a lower temperature with specific detergents will save energy
TUMBLE DRYER MAINTENANCE AND CARE

HOW TO PREPARE AND DRY YOUR CLOTHES

Wash your clothes first and make sure all the water is spun out of them in the washing machine before putting them into the tumble dryer. If you put soaking wet washing that has been hand washed in the tumble dryer, the water from the sodden clothes will seep through the drum onto the elements and other electrical parts causing the machine to blow.

NB: Do not leave the dryer unattended when in operation i.e. do not leave the house or leave the dryer on whilst asleep.

To ensure any excess fluff is removed after each use, make sure you follow the guidelines for proper cleaning and maintenance as outlined below.

HOW TO CLEAN YOUR FLUFF FILTER

STEP 1
Open the door of your dryer.

STEP 2
Pull out the filter (using the two finger grips).

STEP 3
Clean any fluff deposits from the filter mesh.

STEP 4
Refit the filter – make sure the arrows are facing you.

STEP 5
Make sure the filter is pushed fully home – never run the dryer without the filter in position.

The items shown in this guide are illustrative examples and may not match the exact items in your residence.

BRIGHTHELM ONLY

BOILERS

Some University properties have separate boilers which do not run off the main district heating system. These boilers are stand alone and are used to provide either the central heating or the hot water or both.

They can either be a combination (“combi”) boiler which delivers hot water on demand or they can be a system boiler which uses a sealed hot water storage cylinder (usually located in an airing cupboard) which will have a control panel to set the heating or hot water on a timer.

If you do not have a set of written instructions and you wish to find out how to control the settings then please contact your Porter or Building Manager to advise you.

COMBI BOILERS

On the front of the boiler, behind a pull down flap, there is a switch that sets either:

1. The heating and hot water to be ON – winter setting
2. The hot water only to come ON – summer setting
3. The hot water or heating to be OFF – do not use this setting.

Make sure you have the boiler at the correct setting. There is also a thermostatic control located next to the switch. This dial controls the temperature of the water coming out of your taps and the temperature of the water flowing around your radiators. Set this to a medium to high setting (about 70ºC/160ºF) in the winter and turn it down to a medium setting (60ºC/140ºF) in the summer when you do not have the heating on. Sometimes there can also be a timer incorporated into the controls to set the times the heating will come on and go off during the day.

SYSTEM BOILERS

Every boiler is slightly different depending on the make and model; some are similar to that of a combi boiler with the controls in the front panel. The only difference is that there is usual a separate timer and/or thermostat to control the temperature of the heating and the times that you wish the heating and hot water to come on and go off during the day.

HEALTH AND SAFETY – IMPORTANT

• If the boiler does not work for any reason, please notify the Porter
• do not attempt to dissemble the boiler unit.

KINGS ROAD ONLY

CENTRAL HEATING AND HOT WATER TIMER

In Kings Road the on and off times of the central heating and hot water timer is set and you should not attempt to adjust this yourselves. The hot water is set to Constant for constant hot water. The heating is set to come on Constant as the room thermostat adjusts the temperatures at certain times of the day.

All six-digit numbers should be prefaced with 01273 if using a mobile or calling from outside the area.

### Emergency telephone numbers

**IN ALL EMERGENCIES**
- Telephone the emergency number 3333 (or 999 if off campus) and provide information about the emergency and the location (eg room number and building).
- Security staff will call the emergency services and direct emergency vehicles to the scene.

Please note: the 3333 number must only be used for emergencies – please do not use this number for general enquiries.

**THERE ARE EMERGENCY TELEPHONES LOCATED AROUND THE CAMPUS (IDENTIFIABLE BY A FLASHING BLUE LIGHT), WHICH CAN BE USED AT ALL TIMES TO SUMMON ASSISTANCE.**

**OUT-OF-HOURS NON-EMERGENCY INCIDENTS (EG SERIOUS REPAIRS SUCH AS FLOODING, POWER FAILURE, EXCESSIVE NOISE, LOCK-OUTS, ETC)**

On campus during normal working hours on weekdays, there is a Porter on duty at all the main residential reception areas. There is always a Duty Porter and Security Officers available at the 24-hour Service Centre and Security Office in York House.
