

DISRUPTING HIGHER EDUCATION: 14 YEARS OF CHEER

US
UNIVERSITY
OF SUSSEX

The Centre for Higher Education and
Equity Research (CHEER)

26 MAY 2022

CHEER is part of critically informed social change, bringing together new interdisciplinary understandings of the creation, exchange and transfer of knowledge, and its social justice purpose, distribution and impact on society, higher education policy, practices and processes.

This event marks the significance of CHEER's contribution to questions of equity, inclusion, and diversity in the global academy, and is committed to examining and reviewing the systems, and gives us the opportunity to thank Louise for all her work as CHEER Director as she moves on from Sussex. With a series of short talks including invited contributions from CHEER collaborators across the globe, we will consider past and future areas of higher education in need of disruption.

ABOUT

This event celebrates the contribution of Professor Louise Morley, who has led CHEER since its foundation in 2007. Under her leadership, CHEER has become nationally and internationally-esteemed with extensive links with other centres of excellence across the globe.

VENUE

Ironworks Studios Brighton.
30 Cheapside
Brighton
