

A sustainable service

We recognise that the business of printing has an effect on the environment, not only through the consumption of paper but also through the use of chemicals and energy required for us to provide our services.

We are committed to operating sustainably and to minimising the environmental impact of our activities, and have taken measures to ensure that their effects are minimised:

- By choosing digital print technology we have reduced waste and eliminated the use of chemicals and ink associated with lithographic printing
- All our waste paper and used toner cartridges are recycled
- Internal deliveries are made using SEF's **Green smart** electric van
- Our digital presses carry the **Energy Star** badge for energy efficiency
- All our standard papers are certified by the **Forest Stewardship Council (FSC)** or the **Programme for the Endorsement of Forest Certification (PEFC)**, or carry the **EU Ecolabel**, indicating that they are sustainably sourced and meet a set of environmental standards specified by the relevant body.
- All our external partners carry both **ISO 14001** environmental accreditation and are **FSC-certified**.

More information on these organisations and standards can be found by visiting the websites shown below.
